	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20MA1T01: LINEAR ALGEBRA</b>				

**Course Objectives:**

- This course will illuminate the students in the concepts of calculus and linear algebra.
- This course equips the students with standard concepts and tools an intermediate level to advanced level and to develop the confidence; ability to handle various real world problems and their applications.

**Bridge Course:** Limits, continuity, Types of matrices

**Course Outcomes:**

At the end of the course, the student will be able to

1. Develop the use of matrix algebra techniques that is needed by engineers for practical applications (K3)
2. Familiarize with functions of several variables which is useful in optimization (K3)
3. Learn important tools of calculus in higher dimensions. Students will become familiar with double integral(K3)
4. Familiarize with triple integral and also learn the utilization of special functions.(K4)

**Unit I: Matrix Operations and Solving Systems of Linear Equations**

Rank of a matrix by Echelon form, Normal form - solving system of homogeneous and non-homogeneous linear equations- Gauss Elimination, Jacobi and Gauss Seidel methods

**Learning Outcomes:**

At the end of this unit, the student will be able to

- Solve system of linear equations. (K2)
- Determine the rank of a matrix. (K2)

**Unit II: Eigen values and Eigen vectors**

Eigen values and Eigen vectors - and their properties (without proof). Cayley - Hamilton theorem (without proof), Finding inverse and powers of a matrix by Cayley - Hamilton theorem - Reduction of a matrix to diagonal form.

**Learning Outcomes:**

At the end of this unit, the student will be able to

- Find eigen values and eigen vectors of a matrix. (K2)
- Find inverse and powers of a matrix by Cayley-Hamilton theorem.(K2)

**Unit III: Quadratic forms**

Quadratic forms and nature of the quadratic forms, reduction of quadratic form to canonical form by orthogonal transformation.

**Learning Outcomes:**

At the end of this unit, the student will be able to

- Reduce a matrix to diagonal form and identify special properties of a matrix, such as positive definite, etc., and use this information to facilitate the calculation of matrix characteristics; (K3)

#### **Unit IV: Multivariable calculus**

Expansions of functions: Taylor's and Maclaurin's series- Partial derivatives, total derivatives, chain rule, change of variables, Jacobians, maxima and minima of functions of two variables, method of Lagrange multipliers.

#### **Learning Outcomes:**

At the end of this unit, the student will be able to

- Expand the given function as Taylor's and Maclaurin's series.(K3)
- Find partial derivatives numerically and symbolically and use them to analyze and interpret the way in which a function varies. (K3)
- Acquire the knowledge in maxima and minima of functions of several variables (K1)
- Utilize Jacobian of a coordinate transformation to deal with the problems in change of variables (K3)

#### **Unit V: Multiple Integrals**

**Double Integrals:** Change of order of integration, double integrals in polar coordinates, areas enclosed by plane curves.

**Triple Integrals:** Evaluation of triple integrals, change of variables.

#### **Learning Outcomes:**

At the end of this unit, the student will be able to

- Evaluate double integrals of functions of several variables in two dimensions using Cartesian and polar coordinates.(K3)
- Apply double integration techniques in evaluating areas bounded by a region.(K4)

#### **Textbooks:**

1. B. S. Grewal, Higher Engineering Mathematics, 43/e, Khanna Publishers, 2015.

#### **References:**

1. Erwin Kreyszig, Advanced Engineering Mathematics, 9/e, John Wiley & Sons, 2013.
2. B.V. RAMANA, Higher Engineering Mathematics, Tata McGraw Hill, 2007.

<b>I SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20BS1T02: ENGINEERING CHEMISTRY</b>				

## COURSE OUTCOMES

**At the end of semester, the students will be able to**

**CO1:** Explain the impurities present in raw water, problems associated and how to avoid them (K2)

**CO2:** Explain the advantages of Polymers in daily life (K2)

**CO3:** Explain the theory of construction of battery and fuel cells and theories of corrosion and prevention methods. (K2)

**CO4:** Differentiate conventional and non-conventional energy sources and their advantages and disadvantages. (K2)

**CO5:** Identify the usage of advanced materials in day to day life (K2)

## UNIT I: WATER TECHNOLOGY

[9 Hours]

### Part-A

Hard water-Types of hardness-Units of Hard Water-Disadvantages of hard water-Determination of hardness by EDTA complexometric method.

Portable water- its specifications-steps involved in purification of water (Sedimentation, Filtration, Disinfection)-chlorination, break point of chlorination.

Boiler Feed Water-Boiler troubles: Scale and sludge-priming and foaming-boiler corrosion-caustic embrittlement.

### Part-B

Industrial Water Treatment: Softening methods: zeolite process-ion exchange process.

Brackish water treatment (desalination methods): Reverse osmosis - electro dialysis.

### Learning Outcomes: At the end of this unit, the students will be able to Explain

The impurities present in raw water, problems associated with them and how to avoid them

## UNIT-II: POLYMERS AND COMPOSITE MATERIALS

[9 Hours]

### Part-A

Polymers-degree of polymerization-functionality-preparation, properties and applications of individual polymers-Bakelite-PVC-Poly styrene.

Plastics: Types (thermosetting and thermoplastic)-compounding of plastics-moulding Process. (Injection moulding, Compression moulding, Extrusion moulding, Transfer moulding)

### Part-B

Rubbers and elastomers: Introduction-natural rubber-vulcanization of rubber-synthetic rubbers-Buna-N, Buna-S.

Composite materials: Fiber reinforced plastics-biodegradable polymers-biomedical polymers, Recycling of e-waste.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Outline** the properties of polymers and various additives added and different methods of forming plastic materials.
- **Explain** the preparation, properties and applications of some plastic materials.
- **Discuss** natural and synthetic rubbers and their applications.

**UNIT III: ELECTRO CHEMICAL CELLS AND CORROSION [12 Hours]**

**Electrochemical Cells:** Introduction–single electrode potential - electrochemical cell-electrochemical series and applications. Reference electrodes-standard hydrogen electrode and calomel electrode-construction of glass electrode. Batteries: Construction, working and cell reaction of primary (dry cell) and Secondary (Pb acid and Li-ion) battery. Fuel cells (H<sub>2</sub>-O<sub>2</sub>, Methanol-Air cells).

**Corrosion:** Cause and consequences of corrosion-theories of corrosion (Chemical and Electrochemical corrosion)-types of corrosion (Galvanic, Differential aeration (waterline and pitting corrosion), stress Corrosion). Factors influencing rate of corrosion-nature of metal-nature of corrosive atmosphere. Corrosion Prevention methods: Cathodic protection-Sacrificial anodic method-Impressed voltage method. Metallic coatings: Galvanization-Tinning-Electro plating-Electro less plating.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Explain** the theory of construction of battery and fuel cells.
- **Categorize** the reasons for corrosion and study some methods of corrosion control.

**UNIT IV: CONVENTIONAL AND NONCONVENTIONAL ENERGY RESOURCES [9 Hours]**

**Conventional energy sources:** Classification and characteristics of fuels-solid, Liquid and gaseous fuels-advantages and disadvantages-calorific value-higher and lower calorific values-construction and working of bomb calorimeter-analysis of coal-proximate and ultimate analysis-numerical problems related to bomb calorimeter, Dulong's formula and coal analysis-petroleum refining-cracking – petrol and diesel knocking – octane number and cetane number – gaseous fuels – Natural gas – CNG - LPG

**Non-conventional energy sources:** Solar energy: Advantages-disadvantages of solar cells-construction and working of photo voltaic cell -Introduction to hydro power-geo thermal power-tidal and wave power.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Differentiate** conventional and non-conventional energy sources and their advantages and disadvantages.
- **design** sources of energy by different natural sources

**UNIT V: CHEMISTRY OF MATERIALS [9 Hours]**

**Part-A**

Nano materials: Introduction-sol-gel method-characterization by SEM and TEM methods- carbon nanotubes and fullerenes: Types, preparation and applications

Semiconductors: Preparation (Distillation, Zone refining)

**Part-B**

Cement: Constituents of cement -Setting and Hardening of cement - Decay of Cement.

Refractories: Definition of refractory-classification and properties of refractoriness-applications of refractories.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Outline** the awareness of materials like nano materials and fullerenes and their uses.
- **Explain** the techniques that detect and measure the surface properties of materials.
- **Illustrate** the commonly used industrial materials.

**Text Books:**

**T1.** A Text Book of Engineering Chemistry -N. Y. S. Murthy, V. Anuradha& K. RamanaRao, Maruthi Publications. (2018)

**T2.** A Text Book of Engineering Chemistry - K. SesaMaheswaramma, MridulaChugh, Pearson Publications (2018).

**Reference Books:**

**R1.** Engineering Chemistry – Jain & Jain, DhanpatRai Publishing Company (Latest Edition)

**R2.** Text Book of Engineering Chemistry - ShashiChawla, DhanpatRai& Co. (P) Limited ((Latest Edition))

**R3.** Chemistry –PrasantaRath, SubhenduChakroborthy, Cengage publications (2018)

<b>I SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20HS1T01: ENGLISH</b>				

## A. PROGRAMMECONTENT

- 1 Intensive and extensive reading
- 2 Written communication
- 3 Listening and oral communication
- 4 Vocabulary consolidation and expansion
- 5 Practicing grammar

## B. ELABORATIONOF THEPROGRAMMECONTENT

### 1. Intensive and Extensive Reading

- a. Identifying the main theme/the central idea of a passage
- b. Understanding the meaning of words, phrases and sentences in context
- c. Understanding the logical relationship between sentences (through recognition of grammatical structures such as linkers and connectors)
- d. Distinguishing statements of fact from beliefs, opinions, hypotheses, and expressions of probability and certainty
- e. Inferring facts, opinions, instances, reasons, causes, results, requests, conclusions, and general statements
- f. Skimming passages to identify general ideas and information
- g. Scanning passages to locate specific detail
- h. The use of one's knowledge, opinions and imagination to provide information/ situations related to that given in the text; and comparison and contrast.

### 2. Written Communication

- a. Writing outlines and summaries
- b. Writing paragraphs with attention to topic sentences and supporting sentences
- c. Writing paragraphs with attention to coherence and cohesion
- d. Practicing clutter-free writing

### 3. Listening and Oral Communication

- a. Effective listening involving
  - Identification of keywords and phrases and specific information, application of one's previous knowledge of to understand the ideas dealt with in the text being list end to.
  - Attention to communication strategies such as approaching a other person and opening a conversation with him/her, making friends with a stranger, thanking, apologizing, paying a compliment, seeking clarification, making enquiries, and creating an appropriate context for a formal discussion.
- b. Taking part in speaking activities for interactional purposes such as,
  - Introducing oneself to others, introducing others, making enquiries, seeking information
  - Responding to enquiries, supplying information
  - Expressing agreement/disagreement in information situations
- c. Taking part in speaking activities for transactional purposes with attention to the communication strategies listed in 1(a) above.

#### 4. Vocabulary consolidation and expansion

- a. Inferring word meaning from available clues
- b. Distinguishing words with similar meanings
- c. Using connecting words
- d. Learning one-word substitutes

Developing a verbal repertoire with the following dimensions:

- Contexts of use
  - Collocations
  - Differences in speaking and writing
  - Strategic use
- e. Using strategic vocabulary to organize and manage both oral and written communication successfully in academic, professional, and social contexts
  - f. Raising one's knowledge of redundancy, circumlocution, and imprecise and confusing expressions in order to avoid the min one's own speech and writing.

#### 5. Practicing grammar

- a. Consolidation as well as remediation in the following areas:  
Parts of speech, Tenses and usage of grammar in context
- b. Learning to avoid some of the common pit falls in the area of grammar in Indian usage of English(e.g. using the present continuous tense to describe actions which happen regularly; using state verbs in the continuous form; tense mixing)

#### C.TEXT BOOK: Building Effective Communication Skills

By Maruthi Publications (2019)

#### Syllabus :

S No	Content
<b>UNIT –I</b>	<b>Vocabulary Building</b> <b>1.1</b> Video Lesson 1.2.1 Word formation 1.2.2. Root words 1.2.3. Prefixes and Suffixes 1.2.4. Synonyms and Antonyms <b>1.3</b> Parts of Speech <b>1.4</b> Note- making, Note-taking
<b>UNIT –II</b>	<b>Basic Writing Skills</b> <b>2.1</b> Video Lesson 2.2.1 Basic sentence structure 2.2.2. <b>I SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20CS1T01: PROBLEM SOLVING USING C PROGRAMMING</b>				

### COURSE OUTCOMES

At the end of the course, student will be able to

**CO1:** Analyse a computational problem and develop an algorithm/flowchart to find its solution (**K2**)

**CO2:** Develop C programs with branching and looping statements, which uses Arithmetic, Logical, Relational or bitwise operators (**K3**)

**CO3:** Divide a given computational problem into a number of modules and develop C program with arrays(**K3**)

**CO4:** Write C programs which use pointers for array processing and parameter passing (**K3**)

**CO5:** Develop C programs with structure or union and files for storing the data to be processed. (**K3**)

#### **UNIT-I**

**Contact Hours : 10**

**INTRODUCTION TO PROGRAMMING :** What is computer, Block diagram of Computer, Development of Computer languages, Translators, Computer Codes, Computer Arithmetic, Programming Techniques, Algorithm, Flowchart

**BASICS OF C :** History of C, Character Set, Identifiers, Keywords, Tokens, Variables, constants, operators, Data types, expressions, expression evaluation, operator precedence and associativity, typecasting C program structure.

**Contact Hours : 8**

#### **UNIT-II**

**CONSOLE I/O OPERATIONS :** Formatted I/O - printf& scanf, Unformatted I/O functions.

**CONTROL FLOW STATEMENTS: Branching Statements** - if, if – else, switch. **Looping statements**- while, do – while, for, nested for. **Unconditional Statements** - break, continue, goto, exit.

**Contact Hours : 12**

#### **UNIT-III**

**ARRAYS :** Array declaration , initialization and Accessing, Types of Arrays : 1-D and 2-D Arrays, Arrays as Function Arguments

**FUNCTIONS:** Introduction to Functions, Types of Function, Function prototypes, parameter passing techniques, Scope of variables, Storage classes, Recursion

**Contact Hours : 8**

#### **UNIT-IV**

**STRINGS:** Reading String from terminal, Writing string to Screen, String Handling Functions.

**POINTERS:** Pointer Declaration, Initialization and Accessing , Types of Pointers, Pointer Arithmetic, Dynamic memory allocation

**Contact Hours : 10**

## UNIT-V

**STRUCTURE** : Introduction to structures, Definition of structure , declaration of structure variable, accessing of structure members, array of structures, **Union, enum, bit fields, typedef**

**FILES** : Introduction to Files, Types of File, File Modes, Writing and Reading Files, File management I/O functions

### Text books

Programming in ANSI C by E. Balguruswamy, Tata Mc-Graw Hill

- Programming With C, Schaum Series

### Reference Books

- The 'C' programming language by Kernighan and Ritchie, Prentice Hall
- Computer Programming in 'C' by V. Rajaraman , Prentice Hall
- Programming and Problem Solving by M. Sprankle, Pearson Education
- How to solve it by Computer by R.G. Dromey, Pearson Education

I SEMESTER	L	T	P	C
	-	-	3	1.5

**20BS1L02: ENGINEERING CHEMISTRY LAB**

**Outcomes:** The experiments introduce volumetric analysis: Acid-Base, complexometric, Redox, Conductometric and potentiometric titrations. Then they are exposed to a few instrumental methods of chemical analysis.

**Thus at the end of the lab course, the student is exposed and able to**

1. Identify the concentration of given solution by different methods of chemical analysis **(K3)**
2. Analyze the water purity by checking hardness, DO and Acidity. **(K4)**
3. Estimate the  $\text{Cu}^{+2}$ ,  $\text{Fe}^{+3}$ ,  $\text{Ca}^{+2}$ ,  $\text{Mg}^{+2}$  ions and Ascorbic acid present in given solution. **(K4)**
4. Identify the pour and cloud point of lubricants. **(K3)**
5. Understand the principles of conductometric and potentiometric titrations. **(K2)**

### Syllabus:

1. Estimation of HCl using standard  $\text{Na}_2\text{CO}_3$  through acid-base titration.
2. Estimate the total hardness of water using standardized EDTA solution through complexometric titration.
3. Estimation of  $\text{KMnO}_4$  using standard  $\text{H}_2\text{C}_2\text{O}_4$  through redox titration method.
4. Estimation of Dissolved Oxygen in given water sample by Winkler's Method
5. Determination of Ferric ( $\text{Fe}^{+3}$ ) ions using standard  $\text{K}_2\text{Cr}_2\text{O}_7$  solution
6. Determination of Copper (II) using standard hypo solution.
7. Estimation of strong acid by using strong base through conductometric titration method.
8. Estimation of strong acid by using strong base through potentiometric titration method.
9. Preparation of polymer (Demo).
10. Determination of Vitamin 'C'.
11. Determination of Pour and Cloud Point of lubricating oils

### Reference Books

1. A Textbook of Quantitative Analysis, Arthur J. Vogel.

I SEMESTER	L	T	P	C
	-	-	3	1.5

**20HS1L01: ENGLISH PROFICIENCY LAB**

### COURSE OBJECTIVES

- To improve the language proficiency of technical under graduates in English with emphasis on LSRW Skills.
- To provide learning environment to practice Listening, Speaking, Reading and Writing Skills within and beyond the classroom environment.
- To assist students to carry on the tasks and activities through guided instructions and materials.
- To effectively integrate English language learning with employability skills and training.
- To design the main course material and exercises with authentic materials drawn from everyday use to cater to everyday needs.
- To provide hands-on experience through case-studies, mini-projects, group and individual presentations.

### COURSE OUTCOMES

#### a) Reading Skills.

- Addressing explicit and implicit meaning of a text.
- Understanding the context.
- Learning new words and phrases.
- Using words and phrases in different contexts.

#### b) Writing Skills:

- Using the basic structure of a sentence.
- Applying relevant writing formats to create paragraphs, essays, letters, E-Mails, reports and presentations.
- Retaining a logical flow while writing.
- Planning and executing an assignment creatively.

#### c) Interactive skills:

- Analyzing a topic of discussion and relating to it.
- Participating in discussions and influencing them.
- Communicating ideas effectively.
- Presenting ideas coherently within a stipulated time.

#### d) Life Skills and Core Skills:

- Examining self-attributes and identifying areas that require improvement self-diagnosis, self-motivation.
- Adopting to a given situation and developing a functional approach to find solutions-adaptability, problem-solving.
- Understanding the importance of helping others-community service, enthusiasm.

### **RELATIONSHIP OF COURSE TO PROGRAMME OUTCOMES**

A	Ability to apply knowledge of mathematics, science, and engineering.	
B	Ability to design and conduct experiments, as well as to analyze and interpret data.	
C	Ability to design an Engineering system, component, or process.	
D	Ability to function on multi-disciplinary teams	
E	Ability to identify, formulate and solve engineering problems.	
F	Understanding of professional and ethical responsibility.	
G	Ability to communicate effectively	√
H	Broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context.	√
I	Recognition of the need for and an ability to engage in life-long learning.	
J	Knowledge of contemporary issues.	
K	Ability to use the techniques, skills, and modern engineering tools necessary for engineering practices.	
L	Ability to find location of substations and benefits derived through their optimal location.	

### **COURSE DESCRIPTION**

Communicating in a language is also a skill. So a student has to look for an opportunity to practice English language in order to acquire proficiency in English. 'Enrich your interactive Skills: Part - A' is designed to provide opportunities for engineering students to revise and consolidate the basic skills in listening, speaking, reading and writing in addition to giving ample practice in various communicative functions and Life skills.

### **PRE REQUISITES**

The student is expected to have basic knowledge in English language and must be able to write in English. He is also expected to possess fundamental knowledge of general English grammar and vocabulary.

### **Syllabus**

<b>Unit</b>	<b>TOPIC</b>
1	Vowels, Consonants, Pronunciation, Phonetic transcripts
2	Word stress and syllables
3	Rhythm and Intonation
4	Contrastive Stress –Homographs
5	Word Stress : Weak and Strong forms , Stress in compound words

**Text Book:**

“InfoTech English” by Maruthi Publications

**Reference Books:**

1. Better English Pronunciation by O’ Connor
2. Phonetics and Phonology – Peter Roach
3. A Grammar of Spoken English – Harold Palmer
4. English Phonetics – Bansal and Harrison

**Testing Pattern:**

<b>A) Internal lab Exam:</b>	<b>30 Marks</b>
Regular performance in the language /communication /lab completion in the lab manual	15M
Written test	15M
<b>B) External lab Exam Pattern:</b>	<b>70 Marks</b>
Written test	30M
Oral test	30M
Viva (during exam marks will be awarded by external examiner)	10M

I SEMESTER	L	T	P	C
	-	-	3	1.5

**20CS1L01: C PROGRAMMING LAB****Course Objectives:**

- To impart knowledge on various Editors, Raptor.
- To make the students understand the concepts of C programming.
- To nurture the students on Control Structures and develop different operations on arrays.
- To make use of String fundamentals and modular programming constructs.
- To implement programs using dynamic memory allocation.
- To explain the concepts of Structure, Unions and files for solving various problems.

**List of Experiments:****1. Introduction to Algorithms and Flowcharts**

- 1.1) Implement Algorithm Development for Exchange the values of Two numbers.
- 1.2) Given a set of n student's examination marks (in the range 0-100) make a count of the number of students that passed the examination. A Pass is awarded for all of 50 and above.
- 1.3) Given a set of n numbers design an algorithm that adds these numbers and returns the resultant sum. Assume N is greater than or equal to zero.

**2. Introduction to C Programming**

- 2.1) Exposure to Turbo C, Code Blocks IDE, Dev C++, Falcon C++.
- 2.2) Writing simple programs using printf(), scanf() .

**3. Raptor**

- 3.1) Introduction to Raptor.
- 3.2) Draw a flow chart to find the Sum of 2 numbers.
- 3.3) Draw a flow chart to find Simple interest.

**4. Basic Math**

- 4.1) Write a C Program to convert Celsius to Fahrenheit and vice versa.
- 4.2) Write a C Program to find largest of three numbers using ternary operator.
- 4.3) Write a C Program to Calculate area of a Triangle using Heron's formula.

**5. Control Flow- I**

- 5.1) Write a C Program to Find Whether the Given Year is a Leap Year or not.
- 5.2) Write a C program to find the roots of a Quadratic Equation.
- 5.3) Write a C Program to make a simple Calculator to Add, Subtract, Multiply or Divide Using Switch...case.

**6. Control Flow- II**

- 6.1) Write a C Program to Find Whether the Given Number is Prime number or not.
- 6.2) Write a C Program to Find Whether the Given Number is Armstrong Number or not.
- 6.3) Write a C program to print Floyd Triangle.

**7. Control Flow- III**

- 7.1) Write a C program to find the sum of individual digits of a positive integer.
- 7.2) Write a C program to check whether given number is palindrome or not.
- 7.3) Write a C program to read two numbers, x and n, and then compute the sum of the geometric progression  $1+x+x^2+x^3+\dots+x^n$ .

**Practice Programs:**

- Write a C program to print all natural numbers from 1 to n. - using while loop
- Write a C program to print all natural numbers in reverse (from n to 1). - using while loop
- Write a C program to print all alphabets from a to z. - using while loop

- Write a C program to print all even numbers between 1 to 100. - using while loop
- Write a C program to print sum of all even numbers between 1 to n.
- Write a C program to print sum of all odd numbers between 1 to n.
- Write a C program to print table of any number.
- Write a C program to find first and last digit of any number.
- Write a C program to count number of digits in any number.
- Write a C program to calculate sum of digits of any number.
- Write a C program to calculate product of digits of any number.
- Write a C program to swap first and last digits of any number.
- Write a C program to enter any number and print its reverse.
- Write a C program to enter any number and check whether the number is palindrome or not.
- Write a C program to find frequency of each digit in a given integer.
- Write a C program to enter any number and print it in words.
- Write a C program to print all ASCII character with their values.
- Write a C program to enter any number and print all factors of the number.
- Write a C program to enter any number and calculate its factorial.
- Write a C program to find HCF (GCD) of two numbers.
- Write a C program to find LCM of two numbers.
- Write a C program to check whether a number is Prime number or not.
- Write a C program to check whether a number is Armstrong number or not.
- Write a C program to check whether a number is Perfect number or not.
- Write a C program to check whether a number is Strong number or not.
- Write a C program to print Fibonacci series up to n terms.

## 8. Arrays

- 8.1) Write a C program to search an element in the given array (Linear Search).
- 8.2) Write a C program to perform matrix addition.
- 8.3) Write a C program to perform matrix multiplication.

### Practice Programs:

- Write a C program to read and print elements of array.
- Write a C program to find sum of all array elements. - using recursion.
- Write a C program to find maximum and minimum element in an array. - using recursion.
- Write a C program to find second largest element in an array.
- Write a C program to copy all elements from an array to another array.
- Write a C program to insert an element in an array.
- Write a C program to delete an element from an array at specified position.
- Write a C program to print all unique elements in the array.
- Write a C program to print all negative elements in an array.
- Write a C program to count total number of even and odd elements in an array.
- Write a C program to count total number of negative elements in an array.
- Write a C program to count total number of duplicate elements in an array.
- Write a C program to delete all duplicate elements from an array.
- Write a C program to count frequency of each element in an array.
- Write a C program to merge two array to third array.
- Write a C program to find reverse of an array.
- Write a C program to convert lowercase string to uppercase.
- Write a C program to convert uppercase string to lowercase.
- Write a C program to toggle case of each character of a string.

Write a C program to find total number of alphabets, digits or special character in a string.

### 9. Pointers

- 9.1) Write a C Program to Perform Addition, Subtraction, Multiplication and Division of two numbers using Command line arguments.
- 9.2) Write a C program to find sum of n elements entered by user. To perform this program, allocate memory dynamically using malloc () function.
- 9.3) Write a C program to find sum of n elements entered by user. To perform this program, allocate memory dynamically using calloc () function.

### 10. Functions, Array & Pointers

- 10.1) Write a C Program to demonstrate parameter passing in Functions.
- 10.2) Write a C Program to find Fibonacci, Factorial of a number with Recursion and without recursion.
- 10.3) Write a C Program to find the sum of given numbers with arrays and pointers.

### Practice Programs:

- Program to change the value of constant integer using pointers.
- Program to print a string using pointer.
- Program to count vowels and consonants in a string using pointer.
- Program to read array elements and print with addresses.

### 11. Strings

- 11.1) Implementation of string manipulation operations with library function:
  - a) copy
  - b) concatenate
  - c) length
  - d) compare
- 11.2) Implementation of string manipulation operations without library function:
  - a) copy
  - b) concatenate
  - c) length
  - d) compare
- 11.3) Verify whether the given string is a palindrome or not.

### 12. Structures

- 12.1) Write a C Program to Store Information of a book Using Structure.
- 12.2) Write a C Program to Add Two Complex Numbers by Passing Structure to a Function.

### 13. Files

- 13.1) Write a C program to open a file and to print the contents of the file on screen.
- 13.2) Write a C program to copy content of one file to another file.
- 13.3) Write a C program to merge two files and store content in another file.

### 14. Application

Creating structures to capture the student's details save them in file in proper record format, search and prints the student details requested by the user.

**Note:** Draw the flowcharts using Raptor from Experiment 3 to Experiment 6.

### Course Outcomes:

- Implement basic programs in C and design flowcharts in Raptor.
- Use Conditional and Iterative statements to solve real time scenarios in C.

- Implement the concept of Arrays and Modularity and Strings.
- Apply the Dynamic Memory Allocation functions using pointers.
- Develop programs using structures, and Files.

<b>I SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	-	-	<b>3</b>	<b>1.5</b>
<b>20IT1L01 : IT WORKSHOP</b>				

**Course Objectives:**

1. The course focuses on enhancing student knowledge in computer peripherals and assembling.
2. To install operating system on computers and create new email account.
3. To understand basic software like WinRAR, WinZip, PDF readers and web browser.
4. To provide technical training to the students on Google tools like forms, calendar, drive, and classroom.

**Course Outcomes:**

Upon successful completion of the course, students will be able to

1. Attain complete knowledge of a computer hardware
2. Able to install basic computer engineering software.
3. Able to do document task through MS office.
4. Attain technically strong usage of Google Tools and Email handling.
5. Able to understand network troubleshooting.

**LIST OF EXPERIMENTS**

**1. Components of Computer & Assembling a Computer:**

Learning about the different parts of the computer and its advancement

- Processor
- Memory – Types
- Motherboard
- Peripheral interfaces – I/O devices

**2. Components of Computer & Assembling a Computer:**

- Learn about the proper connectivity among the devices inside the PC
- Assembling the different parts of the computer inside the cabinet

**3. Productivity Tools - Learning Basic Software:**

- Installation of Productivity tools like WinRAR, WinZip, and PDF Reader.
- Installation of Application programs like Microsoft Office, Image Editor and Web browsers.
- Connect the Printer and Scanner Devices perform printing and scanning operation.

**4. Productivity Tools:**

**Microsoft-Word orientation** –To create project certificate, Formatting Fonts, Drop Cap,Applying Text effects, Using Character Spacing, Borders and Colors, Inserting Header and Footer, Using Date and Time option.

**5. Productivity Tools:**

**Microsoft-Word orientation-** Mail Merge, Macros, References.

**6. Productivity Tools:**

**Microsoft-PowerPoint utilities** - PPT Orientation, Slide Layouts, Inserting Text, Word Art, Formatting Text, Bullets and Numbering, Auto Shapes, Hyperlinks, Inserting Images, Clip Art, Audio, Video, Objects, Tables and Charts.

**7. Productivity Tools:**

**Microsoft-Excel orientation** - Gridlines, Format Cells, Summation, auto fill, Formatting Text,Cell Referencing, Formulae in excel – average, std.deviation etc., Macros.

**8. Productivity Tools:**

**Microsoft-Excel orientation-** Charts, Hyper linking, Split cells, freeze panes, group and outline, Conditional formatting, Sort and Filter, .csv file.

**9. Introduction to Google Tools:**

- Design a Google form and collect a response data among students using Google Form.
- Schedule one day of your activities using Google Calendar.
- Store and retrieve data from cloud storage using Google Drive.
- Orientation towards Google Classroom.

**10. Network basics:**

Introduction, Types of networks, IP addressing, LAN, Network troubleshooting.

II SEMESTER	L	T	P	C
	3	-	-	3

**20MA2T02 : DIFFERENTIAL EQUATIONS AND NUMERICAL METHODS****Course Objectives:**

- To enlighten the learners in the concept of differential equations.
- To furnish the learners with basic concepts and techniques at plus two level to lead them into advanced level by handling various real world applications.

**Unit I: Linear differential equations of higher order:**

Solutions of Non-homogeneous equations of higher order with constant coefficients – with non-homogeneous terms of the type  $e^{ax}$ ,  $\sin ax$ ,  $\cos ax$ , polynomials in  $x^n$ ,  $e^{ax}V(x)$  and  $x^nV(x)$  – Method of Variation of parameters.

**Learning Outcomes:**

At the end of this unit, the student will be able to

- identify the essential characteristics of linear differential equations with constant coefficients (K3)
- solve the linear differential equations with constant coefficients by appropriate method (K3)

**Unit –II: Partial Differential Equations of First Order:**

Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions – Solutions of first order linear (Lagrange) equations and nonlinear (standard types) equations.

**Learning Outcomes:**

At the end of this unit, the student will be able to

- apply a range of techniques to find solutions of standard PDEs (K3)
- outline the basic properties of standard PDEs (K2)

**Unit III: Interpolation**

Finite differences, Differences of a polynomial, relation between operators, to find one or more missing terms, Newton's interpolation formulae, and interpolation with unequal intervals- Lagrange's formula.

**Learning Outcomes:**

After the completion of this unit student will be able to

- explain various discrete operators and find the relation among operators ( K2 )
- apply Newton's forward and backward formulas for equal and unequal intervals ( K3 )

**Unit IV: Numerical Solution of Equations and Numerical integration**

**Numerical Solution of Equations:** Solution of algebraic and transcendental equations - Bisection Method, Method of False Position, Newton-Raphson Method, useful deduction from Newton-Raphson Method.

**Numerical Integration** – Trapezoidal rule, Simpson's  $\frac{1}{3}$  rule and Simpson's  $\frac{3}{8}$  rule.

**Learning Outcomes:**

After the completion of this unit student will be able to

- find approximate roots of an equation by using different numerical methods ( K3 )
- find integral of a function by using different numerical methods ( K3 )

**Unit V: Numerical Methods to Solve Ordinary Differential Equations**

**Numerical Methods to Solve Ordinary Differential Equations** - Taylor's series, Euler's and modified Euler's methods, Runge-kutta method of fourth order for solving first order equations.

Learning Outcomes:

After the completion of this unit student will be able to

- solve ordinary differential equations by using different numerical schemes ( K3 )

**Textbooks:**

1. B. S. Grewal, Higher Engineering Mathematics, 43/e, Khanna publishers,2015.

**References:**

1. Erwin Kreyszig, Advanced Engineering Mathematics, 9/e, John Wiley & Sons, 2013.
2. N.P. Bali and Manish Goyal, A text book of Engineering Mathematics, Laxmi Publications, 2008.

**Course Outcomes:**

At the end of the course, the student will be able to

1. solve the differential equations related to various engineering fields (K3)
2. identify solution methods of partial differential equations that model physical processes (K3)
3. evaluate the approximate roots of polynomial and transcendental equations by different algorithms(K3)
4. solve integrate and ordinary differential equations by various numerical techniques.(K3)

II SEMESTER	L	T	P	C
	3	-	3	3

**20BS2T01: ENGINEERING PHYSICS**

**COURSE OUTCOMES****After completion of course student able to:**

1. Describe Basic crystal systems and determination of crystal structures
2. Explain Magnetic and Dielectric Materials properties
3. Describe Concept of Magnetic Induction and Super Conducting properties
4. Explain Pure & Doped Semiconductor materials for better utility
5. Describe Optical fibers and Optical properties of materials and their applications

**SYLLABUS****UNIT –I: CRYSTAL STRUCTURE AND X-RAY DIFFRACTION****CRYSTAL STRUCTURE:**

Introduction – Space lattice – Basis – Unit Cell – Lattice parameters – Bravais lattices – Crystal systems – Structures and packing fractions of SC, BCC and FCC.

**X-RAY DIFFRACTION:**

Directions in crystals- planes in crystals- Miller indices and procedure to find Miller indices- Various planes in crystals- Separation between successive (h k l) planes-Bragg's law-Bragg's Spectrometer.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Explain** the seven crystal systems
- **Interpret** the crystal structure based on Bragg's law

**UNIT – II: MAGNETIC AND DIELECTRIC PROPERTIES**

**MAGNETIC PROPERTIES:** Introduction-Magnetic permeability – Magnetization – Relation between three magnetic vectors - Origin of magnetic moment – Classification of Magnetic materials- Dia, Para, Ferro, Anti-Ferro and Ferri-magnetism – Hysteresis- soft and Hard Magnetic materials.

**DIELECTRIC PROPERTIES:** Introduction-Dielectric constant- Relation between three electric vectors-Electronic and ionic polarizations (Quantitative) - orientation polarization(Qualitative) - Internal fields in solids- Clausius-Mossotti equation.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Classify** the magnetic materials into dia, para, ferro, anti ferro and ferri
- **Explain** the importance of hysteresis
- **Explain** the concept of polarization in dielectric materials.
- **Summarize** various types of polarization of dielectrics .
- **Interpret** Lorentz field and Clausius- Mosotti relation in dielectrics.

**UNIT-III: ELECTROMAGNETIC WAVES AND SUPERCONDUCTIVITY**

**ELECTROMAGNETIC WAVES:** Introduction-Electric flux –magnetic flux- Gauss law in electrostatics- Gauss law in magnetostatics- Ampere's law-B for a Solenoid - Biot-Savart's law- Magnetic Induction due to current carrying circular loop- Faraday's law - Maxwell's equations (Integral and differential forms).

**SUPERCONDUCTIVITY:** General and Thermal properties –Meissner effect – Type-I and Type-II superconductors – Flux quantization –BCS Theory of Superconductivity - Josephson effects – Applications of Superconductors.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Illustrate** the concept of electro magnetism based on fundamental laws of electro magnetism
- **Explain** Maxwell's equations
- **Summarize** various properties and applications of superconductors

#### **UNIT-IV: PHYSICS OF SEMICONDUCTORS:**

Classification of solids based on band theory - Intrinsic semiconductors- density of charge carriers- Equation for conductivity – Extrinsic semiconductors- P-type and N-type- density of charge carriers- Drift and diffusion – Einstein's equation – Hall Effect- Hall coefficient – Applications of Hall effect– direct & indirect band gap semiconductors.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Summarize** various types of solids based on band theory.
- **Outline** the properties of n-type and p-type semiconductors.
- **Identify** the type of semiconductor using Hall effect

#### **UNIT-V: LASERS AND OPTICAL FIBERS**

**LASERS:** Introduction– Characteristics of lasers – Spontaneous and Stimulated emission of radiation – Einstein's coefficients – Population inversion - Three level and four level laser pumping schemes - Ruby laser – Helium-Neon laser- Applications of Laser.

**FIBER OPTICS:** Introduction to Optical fibers- Critical angle of propagation- Total internal reflection-Acceptance angle and acceptance cone- Numerical aperture- Classification of optical fibers based on refractive index profile-Classification of optical fibers based on modes- Attenuation in optical fibers - Applications of optical fibers.

**Learning Outcomes: At the end of this unit, the students will be able to**

- **Design** various types of lasers
- **Explain** the principle and propagation of light through Optical fibers
- **Discuss** the application of lasers and Optical fibers

II SEMESTER	L	T	P	C
	3	-	3	3

**20CS2T03 : OBJECT ORIENTED PROGRAMMINGS WITH PYTHON**

**Course Objectives:**

- 1 Acquire programming skills in core Python.
- 2 Acquire Object-Oriented Programming features implementation in Python.
- 3 To understand data structures in Python
- 4 Develop the ability to use Operating System functions in python applications
- 5 Able to use exception handling in python programs

**Course Outcomes:**

**CO1:** Recognize core programming basics and program design with functions using Python programming language.

**CO2:** Interpret the high-performance programs designed to strengthen the practical expertise.

**CO3:** Develop applications for real time problems by applying python data structure concepts.

**CO4:** Understand and apply the concepts of packages, handling, multithreading and socket programming.

**CO5:** Analyze the importance of object-oriented programming over structured programming.

**UNIT – I:**

**Introduction to Python:** Features of Python, History of Python, Need of Python Programming, Applications Basics of Python Programming Using the REPL(Shell), Running Python Scripts, Variables, Assignment, Keywords, Input-Output, Indentation.

**Data types:** Integers, Strings, Booleans.

**UNIT – II:**

**Operators and Expressions:** Types - Operators- Arithmetic Operators, Comparison (Relational) Operators, Assignment Operators, Logical Operators, Bitwise Operators, Membership Operators, Identity Operators, Expressions and order of evaluations

**Control Flow:** if, if-elif-else, for, while, break, continue, pass

**UNIT – III:**

**Data Structures:** Lists - Operations, Slicing, Methods; Tuples, Sets, Dictionaries, Sequences. Comprehensions.

**Functions:** Defining Functions, Calling Functions, Passing Arguments, Keyword Arguments, Default Arguments, Variable-length arguments, Anonymous Functions, Fruitful Functions (Function Returning Values), Scope of the Variables in a Function - Global and Local Variables.

**UNIT – IV:**

**Object Oriented Programming in Python:** Classes, Data hiding, 'self-variable', Methods, Constructor, methods, and inheritance: Various Types of Inheritance and Function Overloading, Overriding Methods.

**UNIT – V:**

**Error and Exceptions:** Difference between an error and Exception, Handling Exception, try except block, Raising Exceptions, User Defined Exceptions

**Brief Tour of the StandardLibrary:** Operating System Interface - String Pattern Matching, Mathematics, Internet Access, Dates and Times

**Text Books:**

1. Learning Python, Mark Lutz, Orielly
2. Python Programming: A Modern Approach, VamsiKurama, Pearson
3. R NageswaraRao, “Core Python Programming”, Dream tech press, 2017 Edition
4. Dusty Philips, “Python 3 Object Oriented Programming”, PACKT Publishing, 2<sup>nd</sup> Edition, 2015

**Reference Books:**

1. Think Python, Allen Downey, Green Tea Press
2. Core Python Programming, W.Chun, Pearson.
3. Introduction to Python, Kenneth A. Lambert, Cengage
4. Michael H.Goldwasser, David Letscher, “Object Oriented Programming in Python”, Prentice Hall, 1<sup>st</sup> Edition, 2007.

<b>II SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20IT2T01: IT ESSENTIALS</b>				

### **COURSE OUTCOMES:**

After the completion of this course, students will be able to

1. Understand the concepts of operating systems.
2. Demonstrate the implementation of various software engineering tools.
3. Understand the basics of Internet.
4. Understand the orientation towards web basics.
5. Demonstrate the implementation of various computer graphics concepts.

### **Unit-1**

**Operating Systems:** Introduction, Functions of an operating System, Classification of Operating Systems, System programs, Application programs, Utilities, Installation of Operating Systems, The Unix Operating System, Basic Unix commands.

### **Unit-2**

**Software Engineering:** The evolving role of software, changing nature of software, software myths, Structure of Software Life Cycle, Software engineering methodologies, software requirements, various software engineering tools.

### **Unit-3**

**Internet Basics:** Introduction, Features of Internet, Internet applications, Services of Internet, Logical and physical addresses, Internet Service Providers, Domain Name System, Security-Forms of attacks, legal approaches to network security.

### **Unit-4**

**Web Basics:** Introduction to web, web browsers, web servers, Protocol, HTTP/HTTPS, TCP/IP, Email, FTP, SMTP, SNMP, URL, HTML and CSS.

### **Unit-5**

**Computer Graphics:** Scope of Computer Graphics, Overview of 3D Graphics, Modelling-modelling individual objects, modelling entire scenes. Dealing with global lighting - Ray tracing, Radiosity. Rendering and Animation.

### **TEXTBOOKS**

1. J.GlennBrookshear,“ComputerScience:AnOverview”,Addison-Wesley,TwelfthEdition,2014.
2. PradeepKSimha,“ComputerFundamentals-Concepts,Systems&Applications”,8<sup>th</sup>edition,BPB.

II SEMESTER	L	T	P	C
	3	-	-	3
<b>20EE2T01: BASIC ELECTRICAL AND ELECTRONICS ENGINEERING</b>				

**COURSE OUTCOMES:** *After successful completion of this course, students should be able to:*

- CO1 : Analyze different electrical networks using KVL, KCL and Theorems.
- CO2 : Understand the basic concepts of single-phase system for simple AC circuit.
- CO3 : Demonstrate the construction, working and operating characteristics of AC & DC machines.
- CO4 : Study the construction details, operation and characteristics of various semiconductor devices, digital and logic operations.

## SYLLABUS

### UNIT-I : ELECTRICAL CIRCUITS

Basic definitions – types of network elements Electrical Circuit Elements (R, L and C), Voltage and Current Sources, Ohms Laws, Kirchoff's Laws and Star/Delta Conversion, Series-Parallel- Series and Parallel (Only Resistor), Superposition, Thevenin's and Norton's Theorems, Problems in Simple Circuits with DC Excitation.

### UNIT-II : AC FUNDAMENTALS

Representation of Sinusoidal Waveforms, Peak and RMS Values. Real Power, Reactive Power, Apparent Power, Power Factor. Concept of phase angle and phase difference Single phase Circuits - Voltage and Current Relations in Star/Delta Connections-Simple Problems.

### UNIT-III : ELECTRICAL MACHINES

Electrical Machines: DC Machines: Classification of DC Machines-DC Generator and Motor Construction-Principle of operation –EMF Equation-Performance Characteristics-Simple problems AC Machines: Classification of AC Machines-Transformers-Synchronous Machines, Induction motor Performance Characteristics-Starting Methods-Simple problems.

### UNIT- IV : Semi -Conductor Devices and Its Characteristics

Characteristics of PN Junction Diode — Zener Diode- Intrinsic and Extrinsic Semiconductors – Semiconductor Diodes– Bipolar Junction Transistors-CB, CE, CC Configurations and Characteristics – FET – MOSFET – Silicon-controlled Rectifier – DIAC – TRIAC-Half wave and Full wave Rectifiers-Voltage Regulation.

### UNIT-V : INTRODUCTION TO DIGITAL ELECTRONICS

Binary Number System – Logic Gates – Boolean Algebra -De Morgan's Theorem-Simplification of Boolean Expressions using De Morgan's Theorem – Half and Full Adders – A/D and D/A Conversion.

### TEXT BOOKS:

1. Basic Electrical Engineering, D.P. Kothari and I.J. Nagrath, 3rd edition 2010, Tata McGrawHill.

2. Basic Electrical Engineering, P. V. Prasad, S. Sivanagaraju, K. R. Varmah, and Chikku Abraham, Cengage, 2019.
3. Basic Electrical & Electronics Engineering – J. B. Gupta, S. K. Kataria & Sons Publications, 2019 edition.

**REFERENCE BOOKS:**

1. Basic Electrical Engineering - D.C. Kulshreshtha, 2009, Tata McGraw Hill.
2. Fundamentals of Electrical Engineering, L.S. Bobrow, Oxford University Press, 2011
3. Electrical and Electronics Technology, E. Hughes, 10th Edition, Pearson, 2010.
4. Electrical Engineering Fundamentals, Vincent Deltoro, Second Edition, Prentice Hall India, 1989.
5. Principles of Electrical Engineering and Electronics”, V K Mehta & RohitMehta, S Chand Publishers, 2019 edition.

II SEMESTER	L	T	P	C
	-	-	3	1.5

**20CS2L03: OBJECT ORIENTED PROGRAMMING LAB WITH PYTHON**

**COURSE OUTCOMES:**

**CO1:** Apply core programming basics and program design with functions using Python programming language.

**CO2:** Interpret the high-performance programs designed to strengthen the practical expertise.

**CO3:** Develop applications for real time problems by applying python data structure concepts.

**CO4:** Test and apply the concepts of packages, handling, multithreading and socket programming.

**CO5:** Divide the importance of object-oriented programming over structured programming.

**Exercise 1 - Basics**

- Running instructions in Interactive interpreter and a PythonScript
- Write a program to purposefully raise Indentation Error and Correct it

**Exercise 2 - Operations**

- Write a program to compute distance between two points taking input from the user.
- Write a program add.py that takes 2 numbers as command line arguments and prints its sum.

**Exercise - 3 Control Flow**

- Find the sum of all the primes below two million. Each new term in the Fibonacci sequence is generated by adding the previous two terms. By starting with 1 and 2, the first 10 terms will be: 1, 2, 3, 5, 8, 13, 21, 34, 55, 89...
- By considering the terms in the Fibonacci sequence whose values do not exceed four million, find the sum of the even-valued terms.

**Exercise 4 - Control Flow - Continued**

- Find the sum of all the primes below two million. Each new term in the Fibonacci sequence is generated by adding the previous two terms. By starting with 1 and 2, the first 10 terms will be: 1, 2, 3, 5, 8, 13, 21, 34, 55, 89...
- By considering the terms in the Fibonacci sequence whose values do not exceed four million, find the sum of the even-valued terms.

**Exercise - 5 - DS**

- Write a program to count the numbers of characters in the string and store them in a dictionary data structure
- Write a program to use split and join methods in the string and trace a birthday with a dictionary data structure.

**Exercise - 6 DS - Continued**

- Write a program combine lists that combines these lists into a dictionary.
- Write a program to count frequency of characters in a given file. Can you use character frequency to tell whether the given file is a Python program file, C program file or a text file?

**Exercise - 7 Files**

- Write a program to print each line of a file in reverse order.
- Write a program to compute the number of characters, words and lines in a file.

### Exercise - 8 Functions

- a) Write a function ball collides that takes two balls as parameters and computes if they are colliding. Your function should return a Boolean representing whether or not the balls are colliding. Hint: Represent a ball on a plane as a tuple of (x, y, r), r being the radius  
If (distance between two balls centers)  $\leq$  (sum of their radii) then (they are colliding)
- b) Find mean, median, mode for the given set of numbers in a list.

### Exercise - 9 Functions - Continued

- a) Write a function nearly equal to test whether two strings are nearly equal. Two strings a, b are nearly equal when a can be generated by a single mutation on b.
- b) Write a function dups to find all duplicates in the list.
- c) Write a function unique to find all the unique elements of a list.

### Exercise - 10 - Functions - Problem Solving

- a) Write a function cumulative product to compute cumulative product of a list of numbers.
- b) Write a function reverse to reverse a list. Without using the reverse function.
- c) Write function to compute gcd, lcm of two numbers. Each function shouldn't exceed one line.

### Exercise 11 - Multi-D Lists

- a) Write a program that defines a matrix and prints
- b) Write a program to perform addition of two square matrices
- c) Write a program to perform multiplication of two square matrices

### Exercise - 12 - Modules

- a) Install packages requests, flask and explore them. using(pip)
- b) Write a script that imports requests and fetch content from the page.
- c) Write a simple script that serves a simple HTTP Response and a simple HTML Page

### Exercise - 13 OOP

- a) Class variables and instance variable and illustration of the self-variable
  - i) Robot
  - ii) ATM Machine

### Exercise - 14 GUI, Graphics

- a) Write a GUI for an Expression Calculator using tk
- b) Write a program to implement the following figures using turtle.

II SEMESTER	L	T	P	C
	-	-	3	1.5

**20EE2L01: BASIC ELECTRICAL AND ELECTRONICS ENGINEERING LAB**

**COURSE OUTCOMES:** *After successful completion of this course, students should be able to:*

- CO1 : Acquire knowledge on electrical networks by using KVL, KCL.
- CO2 : Analyze the performance characteristics and to determine efficiency of DC machines
- CO3 : Understand the characteristics of AC machines
- CO4 : Apply knowledge on PN junction diode , transistor and Rectifiers

### LIST OF EXPERIMENTS

#### SECTION A: ELECTRICAL ENGINEERING:

1. Verification of KCL& KVL.
2. Open circuit Characteristics of DC Shunt generator.
3. Swinburne's test on DC Shunt Motor.
4. Brake test on DC Shunt motor.
5. Speed control of D.C. Shunt motor by a) Armature Voltage control b) Field flux control method
6. Open circuit and Short circuit test on a Single Phase Transformers.
7. Draw the Torque-Slip Characteristic of a Three Phase Induction Motor.
8. Regulation of Synchronous Machine using EMF Method.

#### SECTION B: ELECTRONICS ENGINEERING:

The following experiments are required to be conducted as compulsory experiments:

1. PN junction diode characteristics a) Forward bias b) Reverse bias (Cut in voltage and Resistance calculations)
2. Transistor CE characteristics (input and output)
3. Half wave rectifier with and without filters.
4. Full wave rectifier with and without filters.

**Any 10 Experiments has to be conducted from Section A& B**

#### REFERENCE BOOKS:

1. Department lab manual.

II SEMESTER	L	T	P	C
	-	-	3	1.5

**20BS2L01: ENGINEERING PHYSICS LAB**

**COURSE OUTCOMES**

**At the end of the course, student will be able to**

CO1: Demonstrate the basic knowledge to know the frequency of a vibrator, hall coefficient, (K3)

CO2: Attain knowledge to verify some of the properties of physical optics. (K4)

CO3: Develop skills to plot various characteristic curves and to calculate the physical properties of given materials. (K4)

CO4: Calculate some the properties of semiconducting materials. (K2)

**STUDENT HAS TO DO ANY TEN OF THE FOLLOWING**

1. Determination of wavelength of Laser using diffraction grating.
2. Determination of Numerical Aperture and Acceptance angle of an Optical Fiber.
3. Determination of the charge carrier density by using Hall Effect.
4. Determination of the Band Gap of a Semiconductor using a p-n junction diode.
5. Study of Characteristic curves (I/V) of a Zener diode to determine its Breakdown voltage.
6. Determination of Temperature coefficient of resistance of a Thermistor by using its Characteristic curve.
7. Study the variation of intensity of magnetic field along the axis of a circular current carrying coil by using Stewart and Gee's experiment.
8. Study of Characteristic curves (I/V) of a P-N diode.
9. Determine Frequency of given electrically driven tuning fork in Transverse and Longitudinal modes by using Melde's apparatus
10. Determine frequency of A.C. supply by using Sonometer.
11. Determination of the Time Constant for a C-R Circuit
12. Determination of the Planck's constant by using Photo-Cell
13. Determination of dielectric constant of a given material

II SEMESTER	L	T	P	C
	-	-	3	1.5

**20HS2L02: ENGLISH COMMUNICATIONS LAB**

### COURSE OBJECTIVES

- To improve the language proficiency of technical under graduates in English with emphasis on LSRW Skills.
- To provide learning environment to practice Listening, Speaking, Reading and Writing Skills within and beyond the classroom environment.
- To assist students to carry on the tasks and activities through guided instructions and materials.
- To effectively integrate English language learning with employability skills and training.
- To design the main course material and exercises with authentic materials drawn from everyday use to cater to everyday needs.
- To provide hands-on experience through case-studies, mini-projects, group and individual presentations.

### COURSE OUTCOMES

#### e) Reading Skills.

- Addressing explicit and implicit meaning of a text.
- Understanding the context.
- Learning new words and phrases.
- Using words and phrases in different contexts.

#### f) Writing Skills:

- Using the basic structure of a sentence.
- Applying relevant writing formats to create paragraphs, essays, letters, E-Mails, reports and presentations.
- Retaining a logical flow while writing.
- Planning and executing an assignment creatively.

#### g) Interactive skills:

- Analyzing a topic of discussion and relating to it.
- Participating in discussions and influencing them.
- Communicating ideas effectively.
- Presenting ideas coherently within a stipulated time.

**h) Life Skills and Core Skills:**

- Examining self-attributes and identifying areas that require improvement self-diagnosis, self-motivation.
- Adopting to a given situation and developing a functional approach to find solutions- adaptability, problem-solving.
- Understanding the importance of helping others-community service, enthusiasm.

**RELATIONSHIP OF COURSE TO PROGRAMME OUTCOMES**

A	Ability to apply knowledge of mathematics, science, and engineering.	
B	Ability to design and conduct experiments, as well as to analyze and interpret data.	
C	Ability to design anEngineering system, component, or process.	
D	Ability to function on multi-disciplinary teams	
E	Ability to identify, formulate and solve engineering problems.	
F	Understanding of professional and ethical responsibility.	
G	Ability to communicate effectively	√
H	Broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context.	√
I	Recognition of the need for and an ability to engage in life-long learning.	
J	Knowledge of contemporary issues.	
K	Ability to use the techniques, skills, and modern engineering tools necessary for engineering practices.	
L	Ability to find location of substations and benefits derived through their optimal location.	

**COURSE DESCRIPTION**

Communicating in a language is also a skill. So a student has to look for an opportunity to practice English language in order to acquire proficiency in English. ‘Enrich your interactive Skills: Part - A’ is designed to provide opportunities for engineering students to revise and consolidate the basic skills in listening, speaking, reading and writing in addition to giving ample practice in various communicative functions and Life skills.

**PREREQUISITES**

The student is expected to have basic knowledge in English language and must be able to write in English. He is also expected to possess fundamental knowledge of general English grammar and vocabulary.

**Syllabus**

Unit	TOPIC
1	Vowels, Consonants, Pronunciation, Phonetic transcripts
2	Word stress and syllables
3	Rhythm and Intonation
4	Contrastive Stress –Homographs
5	Word Stress : Weak and Strong forms , Stress in compound words

**Text Book:**

“InfoTech English” by Maruthi Publications

**Reference Books:**

5. Better English Pronunciation by O’ Connor
6. Phonetics and Phonology – Peter Roach
7. A Grammar of Spoken English – Harold Palmer
8. English Phonetics – Bansal and Harrison

**Testing Pattern:**

**B) Internal lab Exam:**

**30 Marks**

Regular performance in the language /communication /lab completion in the lab manual  
15M

Written test

15M

**B) External lab Exam Pattern:**

**70 Marks**

Written test

30M

Oral test

30M

Viva(during exam marks will be awarded by external examiner)

10M

<b>III SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20IT3T01 : DISCRETE MATHEMATICS</b>				

## Course Objectives:

1. Familiarize closed form solution of linear recurrence relations by various methods.
2. To introduce basics of set theory and its applications
3. Bring awareness of basic concepts of graphs and its applications.
4. To teach the topics on Trees, spanning trees, minimal spanning trees and justification of Kruskal's algorithm.

## Course Outcomes:

Upon successful completion of this course the student should be able to

1. Identify programming errors efficiently through enhanced logical capabilities (K3)
2. Find a general solution of recurrence equation (K3)
3. Learn set theory, graph of the relations which are used in data structures (K3)
4. Explain the concepts in graph theory (K3)
5. Apply graph theory concepts in core subjects such as data structures and network theory effectively. (K3)

**UNIT I:** Mathematical logic Connectives, negation, conjunction, disjunction, statement formula and Truth Tables, conditional and bi-conditional, well-formed formulae, tautologies, equivalence of formulae, duality, tautological implications, functionally complete set of connectives, other connectives, principal disjunctive and conjunctive normal forms, inference calculus, rules of inference, consistency of premises, indirect method of proof, Theory of inference for the statement calculus, validity using Truth tables.

## Learning Outcomes:

After completion of this unit, student will be able to

- find equivalence formulas, implementation of logic for mathematical proofs (K1)
- apply inference theory to verify the consistency of data (K3)

**UNIT II:** Recurrence relations Generating Function of Sequences, Calculating Coefficient of generating functions, Recurrence relations, solving recurrence relation by substitution and Generating functions, the method of Characteristic roots, Solution of Inhomogeneous Recurrence Relation.

## Learning Outcomes:

After completion of this unit student will be able to

- formulate recurrence relations of the sequences (K3)
- solve homogeneous linear recurrence relations (K3)
- evaluate complementary function and particular integral for non-homogeneous linear recurrence relations (K3)
- apply substitution method to solve non-linear recurrence relations (K3)

**UNIT III:** Set theory and Relations. Relations and ordering, Relations, Properties of binary Relations on a set, Relation Matrix and the Graph of a Relation, partition and covering of a set, Equivalence, Compatibility Relations, Composition of Binary Relations, Partial ordering, Hasse diagram, Principle of Inclusion-Exclusion, Pigeonhole Principle and its applications.

## Learning Outcomes:

After completion of this module, student will be able to

- draw Hasse Diagram for the given poset(K3)
- apply principle of inclusion and exclusion and pigeonhole principle to real world problems(K3)

**UNIT IV:** Graph theory Basic Concepts, Representation of Graph, Sub graphs, Multigraphs, Euler Paths, Euler circuits, Hamiltonian Graphs and Graph Isomorphism and its related Problems, Chromatic Number. (All Theorems without proofs)

After completion of this unit student will be able to

- identify different graphs and their properties (K3)
- construct Euler and Hamiltonian graphs(K3)
- construct the graph for the given data (K3)

**UNIT V:** Trees Spanning Trees, minimal Spanning Trees, BFS, DFS, Kruskal's Algorithm, Prim's Algorithm, Binary trees, Planar Graphs. (All Theorems without proofs)

Learning Outcomes:

After completion of this unit, student will be able to

- construct the spanning tree and binary trees from graphs (K3)
- build minimal spanning tree by using different algorithms (K3)

Textbooks:

1. J.P. Tremblay and R. Manohar, Discrete Mathematical Structures with Applications to Computer Science, Tata McGraw Hill, 1997.

<b>III SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20BM3T01 : MANAGERIAL ECONOMICS AND FINANCIAL ANALYSIS</b>				

**Course Objectives:**

1. To acquire knowledge of economics to facilitate the process of economic decision making
2. To analyze production function and its laws of variable proportions and cost concepts
3. To differentiate and distinguish price and output decisions in different market structures
4. To compare and contrast the differences between private and public sector in their functioning
5. To develop the skills and to analyze financial statements

**Course Outcomes:**

1. Describe the importance of Managerial Economics and its utility in decision making(K2)
2. Generalize the meaning and usefulness of the production function and cost function in analyzing the firms production activity(K2&K3)
3. Comprehend the market structure, different types of markets and pricing policies(K4&K1)
4. Identify the different forms of business organization and analyze their merits and demerits(K1)
5. Evaluate the Investment proposal through techniques of capital budgeting and financial performance of the company through financial statements(K5)

**UNIT-I Managerial Economics and Demand Analysis:**

Definition – Nature and Scope of Managerial Economics - Relation with other disciplines - Concept of Demand-Types-Determinants - Law of Demand - Elasticity of Demand - Types and Measurement-Demand forecasting.

**UNIT-II Production and Cost Analysis:**

Production function - Law of Variable proportions - Isoquants and Iso costs -Law of returns- Economies of Scale - Cost Concepts - Cost Volume Profit Analysis – Applications of BEP (Simple Problems).

**UNIT-III Market Structures and Pricing Policies:**

Perfect Competition, Monopoly, Monopolistic Competition and Oligopoly – Features – Price & Output Determination - Pricing Methods

**UNIT-IV Forms of Organizations and Business Cycles:**

Business Organization- Sole Trader – Partnership - Joint Stock Company - State/Public Enterprises and their forms - Business Cycles: Meaning and Features - Phases of Business Cycle.

**UNIT-V Capital Budgeting and Accounting:**

Concept and sources-Techniques of evaluating capital budgeting (Simple problems)

Introduction to Accounting: Branches-Systems of Accounting-Single Entry-Double Entry System-Journal-Ledger-Trail Balance-Final Accounts-Ratio Analysis(Simple problems)

**TEXTBOOKS:**

1. Aryasri: Managerial Economics and Financial Analysis, 2/e, TMH, 2005.
2. T.V.Ramana & B. Kuberudu: Managerial Economics and Financial Analysis, Himalaya Publishing House, Mumbai
3. Varshney & Maheswari: Managerial Economics, Sultan Chand, 2003.

<b>III SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20IT3T02 : COMPUTER ORGANIZATION</b>				

### COURSE OBJECTIVES

1. To discuss the basic knowledge of computer system including the analysis and design of components of the system.
2. To understand the register transfer language, micro operations and design of basic components of the system.
3. To explain different types of addressing modes and memory organization.
4. To learn the concepts of parallel processing, pipelining and vector processing.

### COURSE OUTCOMES

After completion of the course students able to

1. Explain knowledge on structure of computers and computer arithmetic.
2. Analyze Micro operations such as Arithmetic micro operations, Shift micro operations and Logic micro operations.
3. Define the appropriate addressing modes and instructions for writing programs.
4. Demonstrate the Peripheral devices for efficient operation of system.
5. Describe the basic knowledge on parallel and vector processing.

### UNIT-I

#### **Basic Structure of Computers:**

Basics of computer, Von Neumann Architecture, Generation of Computer, Types of Computer, Functional unit, Basic Operational Concepts and Bus Structures.

**Computer Arithmetic:** Addition and Subtraction, multiplication algorithms, Division Algorithms.

### UNIT-II

**Register Transfer Language and Micro Operations:** Register Transfer language. Register Transfer Bus and memory transfers, Arithmetic Micro operations, logic micro operations, shift micro operations, Arithmetic logic shift unit.

**Basic Computer Organization and Design:** Instruction codes, Computer Registers, Computer Instructions, Timing and control, Instruction Cycle, Memory – Reference, Input – Output and Interrupt Instructions. Design of basic computer, Design of Accumulator logic.

### UNIT-III

**Central Processing Unit:** General Register Organization, STACK organization. Instruction formats. Addressing modes. DATA Transfer and manipulation, Program control, Reduced Instruction Set Computer.

**Micro Programmed Control:** Control Memory, Address sequencing, micro program example, design of control unit.

### UNIT-IV

**Input- Output Organization:** Peripheral Devices, Input-Output Interface, Asynchronous data transfer, Modes of Transfer, Priority Interrupts, Direct memory Access.

**The Memory System:** Memory Hierarchy, Main Memory, Auxiliary memory, Associative Memory, Cache Memory and Virtual Memory.

## **UNIT-V**

### **Parallel Processing and Vector Processing**

Pipeline and Vector Processing: Parallel Processing, Pipelining, Arithmetic Pipeline, Instruction Pipeline, RISC Pipeline, Vector Processing, Array Processors.

#### **Text Books:**

1. Computer System Organization, M. Moris Mano, 3<sup>rd</sup> Edition, Pearson / PHI, 2017.
2. Computer Organization, Carl Hamacher, ZvonksVranesic, SafwatZaky, 5<sup>th</sup> Edition, McGraw Hill, 2016.
3. Computer Organization, A quantitative approach, John L. Hennessy and David A.Patterson, Fifth Edition, 2017.

#### **Reference Books:**

1. Computer Organization and Architecture - William Stallings, Ninth Edition, Pearson / PHI, 2012.
2. Structured Computer Organization - Andrew S Tanenbaum, 6<sup>th</sup> Edition, PHI/ Pearson, 2016.

<b>III SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20CS3T01 : DATA STRUCTURES</b>				

### COURSE OBJECTIVES

1. To impart the basic concepts of data structures and algorithms.
2. To gain knowledge of linear and non-linear data structures.
3. To familiarize with different sorting and searching techniques.
4. To understand basic concepts about stacks, queues, lists, trees and graphs.
5. To understand about writing algorithms and step by step approach in solving problems with the help of fundamental data structures

### COURSE OUTCOMES:

After the completion of this course, students will be able to

1. Design applications using stacks and implement various types of queues.
2. Analyze and implement operations on linked lists and demonstrate their applications.
3. Demonstrate operations on trees.
4. Demonstrate implementation of various types of Graphs and Graph Traversals.
5. Implement various searching and sorting techniques.

### UNIT-I:

**Introduction:** Definition of data structure, types and overview of data structures.

**Algorithm:** Preliminaries of algorithm, Algorithm analysis and complexity.

**Stacks and Queues:** Stack Representation using Arrays, operations on stack, Applications of stacks - Factorial Calculation, Infix to postfix Transformation, Evaluating Arithmetic Expressions. Queue Representation using Arrays, operations on queues, Applications of queues, Circular queues, Priority queues, Implementation of queue using stack.

### UNIT-II:

**Linked Lists:** Introduction, Single linked list, representation of a linked list in memory, Operations on a single linked list. Double linked list, Operations on a double linked list. Circular linked list, Operations on a circular linked list. Applications of single linked list.

### UNIT-III:

**Trees:** Basic tree concepts. **Binary Trees:** Properties, Representation of Binary Trees using Arrays and Linked List, Binary Tree Traversals, Creation of binary tree from pre-order, in-order and post order traversals, threaded binary tree. **Binary search trees:** Basic concepts, BST operations: Search, insertion, deletion and traversals, Creation of binary search tree from in-order and pre (post)order traversals.

**AVL Trees:** Self Balanced Trees, Height of an AVL Trees and AVL Tree Rotations.

#### **UNIT-IV:**

**Graphs:** Basic concepts, Representations of Graphs: using Linked list and adjacency matrix, Graph Traversals - BFS & DFS, Applications: Dijkstra's shortest path algorithm, Minimum Spanning Tree using Prim's algorithm and Kruskal's algorithm, Transitive closure, Warshall's algorithm.

#### **UNIT-V:**

**Searching:** Linear Search, Binary Search and Fibonacci search.

**Sorting:** Bubble Sort, Selection Sort, Insertion Sort, Quick Sort, Merge Sort and Radix sort.

**Hashing:** Introduction, Hash Function, Collision Resolution Techniques: Linear Probing, Quadratic Probing, Double Hashing, Rehashing, Separate Chaining, Extendible Hashing.

#### **TEXT BOOKS:**

1. Richard F. Gilberg and Behrouz.A. Forouzan Data Structures: A Pseudo code approach with C, 2<sup>nd</sup> edition, Cengage, 2012.
2. Debasissamanta, Classic Data Structures, PHI, 2<sup>nd</sup> edition, 2016.
3. Yashavant Kanetkar, Data Structures through C, 2<sup>nd</sup> edition BPB publications, 2017.
4. Alfred V Aho, John E Hopcraft, Jeffery D Ullman, Data Structures & Algorithms, Pearson Education Ltd., Second Edition, 2016.

#### **REFERENCE BOOKS**

1. Seymour Lipschutz, Data Structure with C, TMH, 2017.
2. G. A. V. Pai, Data Structures and Algorithms, TMH, 2017.
3. Horowitz, Sahani, Anderson Freed, Fundamentals of Data Structure in C, University Press, 2<sup>nd</sup> edition, 2018.

III SEMESTER	L	T	P	C
	3	-	-	3

**20IT3T03 : JAVA PROGRAMMING**

**COURSE OBJECTIVES:**

1. Gain knowledge about basic Java language syntax and semantics to write Java programs and use concepts such as variables, conditional and iterative execution methods etc
2. Understand the fundamentals of object-oriented programming in Java, including defining classes, objects, invoking methods etc and exception handling mechanisms
3. Understand the principles of inheritance, packages and interfaces.
4. Be aware of the important topics and principles of software development.
5. Have the ability to write a computer program to solve specified problems.
6. Be able to use the Java JDK environment to create, debug and run simple Java programs.

**COURSE OUTCOMES:**

After the completion of this course, students will be able to

1. Know the concepts of OOP and orientation towards Java programming.
2. Apply the inheritance and packages in Java.
3. Implement the concepts of Exception handling and Multithreading.
4. Getting knowledge of I/O concepts and should be able to read and write data from and to File and HttpClient.
5. Know the concepts and usage of Collection framework.

**UNIT-I:**

**Introduction to Java:** History, java features, JDK, JRE, and JVM, program structure, Creating and Executing a Java program, Java tokens, Variables, Arrays, Data types, Operators, Expressions,

**Control statements:** Selection , Iterative and Jump Statements, type conversion and casting.

**Classes and objects:** Class declaration, creating objects, methods, **Constructors:** Types of constructors: Default and Parameterized constructors, overloading methods and constructors, garbage collection, access control, static and this keywords, command line arguments, nested classes.

**UNIT-II:**

**Inheritance:** Extending a class, types of inheritance, super keyword, final keyword, overriding methods, abstract methods and classes.

**Interfaces:** Defining an interface, implementing interface, Differences between classes and interfaces, variables in interface and extending interfaces.

**Packages:** Java API packages, creating and importing packages, importance of CLASSPATH.

**UNIT-III:**

**Exception handling:** Exception handling fundamentals, exception hierarchy, usage of try, catch, throw, throws and finally keywords, built-in and user defined exceptions.

**Multithreading:** Introduction, Differences between multi threading and multitasking, Creating Threads, thread life cycle, thread methods, thread priorities, thread exceptions, thread synchronization, Inter thread communication, Daemon threads.

**UNIT-IV:**

**Input/Output Streams:** Introduction to java I/O, Streams, BufferedStreams, Readers, Reading and Writing data from/to files and HttpClient, Pipelines.

**UNIT-V:**

**Collection Framework:** Lists – ArrayList&LinkedList, Sets - HashSet&TreeSet, Maps - HashMap&TreeMap, Queue, Stack, Iterator – ListIterator, Lambda Expressions.

**Strings:** Strings in java, Creation of a String and String handling methods, StringBuilder, StringBuffer.

**TEXT BOOKS:**

1. Herbert Schildt: “Java The complete reference”, 11th Edition, Tata McGraw Hill, 2019.
2. E.Balaguruswamy: “Programming with Java A Primer”, 5th Edition, Tata McGraw Hill, 2017.

**REFERENCE BOOKS:**

1. Programming in Java by SaurabhChaudhary and SachinMalhotra, revised 2nd edition, Oxford, 2018.
2. Java: How to Program, 8/e, Dietal, Dietal, PHI, 2018.
3. Core JAVA: An integrated approach, Dr. R. NageswaraRao, Wiley, Dream Tech, 2016.

III SEMESTER	L	T	P	C
	-	-	3	1.5

**20CS3L01 : DATA STRUCTURES LAB**

**COURSE OUTCOMES:**

At the end of the lab students are able to

1. Implement stack and queue using arrays and linked lists.
2. Demonstrate applications of stack.
3. Demonstrate the implementation of linked lists.
4. Demonstrate the implementation of binary search trees.
5. Implement different searching and sorting algorithms.

**LIST OF EXPERIMENTS:**

1. Implement a menu driven program for the following operations on stack of integers using arrays.
  - i) PUSH()
  - ii) POP()
  - iii) PEEK()
  - iv) Display of stack elements
2. Implement a program to demonstrate how stack can be used to check whether the given string is palindrome or not.
3. Implement a Program for converting an infix expression to postfix expression.
4. Implement a Program to evaluate postfix expression.
5. Implement a menu driven program for the following operations on queue of integers using arrays.
  - i) Insertion
  - ii) Deletion
  - iii) Queue overflow and underflow conditions
  - iv) Display of queue elements
6. Implement a program for the queue operations by using stacks.
7. Implement a program for the following
  - (i) Create a singly linked list.
  - (ii) Insert an element into a singly linked list.
  - (iii) Delete an element from a singly linked list.
8. Implement a program for stack operations using Linked list.
9. Implement a program for queue operations using linked list.
10. Implement a program to reverse elements of a single linked list.

11. Implement a program for the following

- (i) Create a circular linked list.
- (ii) Insert an element into a circular linked list.
- (iii) Delete an element from a circular linked list.

12. Implement a program for the following

- (i) Create a Doubly linked list.
- (ii) Insert an element into a doubly linked list.
- (iii) Delete an element from a doubly linked list.

13. Implement a program to create a Binary Search Tree of integers, insert, delete and search integers into (from) Binary search tree.

14. Implement a program by using recursive functions to traverse a binary search tree in preorder, in-order and post-order.

15. Implement programs for recursive and iterative functions to perform Linear search for a Key value in the given list.

16. Implement programs for recursive and iterative functions to perform Binary search for a Key value in the given list.

17. Implement following techniques to sort a given list of integers in ascending order.

- (i) Insertion sort
- (ii) Bubble sort
- (iii) Selection sort

18. Implement a program that read any string and sort in alphabetical order using Bubble sort.

19. Implement following techniques to sort a given list of integers in ascending order.

- (i) Quick sort
- (ii) Merge sort

III SEMESTER	L	T	P	C
	-	-	3	1.5

**20IT3L01 : COMPUTER ORGANIZATION LAB**

**COURSE OUTCOMES:**

At the end of the lab, the students are able to

1. Simulate the 8085/8086 microprocessor.
2. Implement the assembly language programs to perform different operations.

**LIST OF EXPERIMENTS:**

**Note: Implement the following list of Assembly Language programs by using 8085/8086.**

- 1a) Write a Program to perform Addition of two numbers.
- 1b) Write a Program to perform Subtraction of two numbers.
- 2a) Write a Program to perform Addition of n numbers.
- 2b) Write a Program to generate n numbers.
- 3a) Write a Program to generate n Even numbers.
- 3b) Write a Program to generate n Odd numbers.
- 4a) Write a Program to move data from one block to another block.
- 4b) Write a Program to mask 4 high-order bits.
- 5a) Write a Program to read data at location 4400 and unpack data into 07, 0E and store in 4401 & 4402.
- 5b) Write a Program to subtract an array of elements to get positive result.
- 6a) Write a Program to find largest element of an array.
- 6b) Write a Program to perform Linear Search operation.
- 7a) Write a Program to find smallest element of an array.
- 7b) Write a Program to find largest value among two numbers.
- 8a) Write a Program to find smallest value among two numbers.
- 8b) Write a Program to find factorial of given number.
- 9a) Write a Program to generate Fibonacci Series.
- 9b) Write a Program to convert a number from Hexadecimal to BCD.
- 10a) Write a Program to separate Even and Odd numbers.
- 10b) Write a Program to find 1's Complement and 2's Complement of a number.
- 11a) Write a Program to perform addition of first n numbers.
- 11b) Write a Program to perform Division of two 8-bit numbers.
- 12a) Write a Program to Convert ASCII to Decimal and vice versa.
- 12b) Write a Program to convert a number from Hexadecimal to Decimal.

III SEMESTER	L	T	P	C
	-	-	3	1.5

**20IT3L02 : JAVA PROGRAMMING LAB**

### COURSE OBJECTIVES

1. Understand the concept of OOP as well as the purpose and usage principles of inheritance, polymorphism, encapsulation and method overloading.
2. Able to implement Exception Handling, Multithreading, Applet programming and Event handling in java.

### COURSE OUTCOMES

After the completion of this course, students will be able to

1. Develop solutions for a range of problems using object-oriented programming.
2. Create Java programs that solve simple business problems.

### LAB EXPERIMENTS

1. Installation of JDK, setting Class path and Executing simple java programs.
2. Write a program that displays welcome dear user followed by user name. Accept username from the user.
3. Write a JAVA program to search for an element in a given list of elements using binary search mechanism.
4. Write a JAVA program that checks whether a given string is a palindrome or not by using command line arguments.
5. Write a JAVA program to implement array of objects.
6. Write a JAVA program to practice using String class and its methods.
7. Write a JAVA program to implement constructor overloading.
8. Write a JAVA program implement method overloading.
9. Write a JAVA program to implement multilevel inheritance by applying various access controls to its data members and methods.
10. Write a JAVA program to create and Manage bank account using inheritance concept.
11. Write a JAVA program to implement Interface. What kind of Inheritance can be achieved?
12. Write a JAVA program to demonstrate super key word.
13. Write a JAVA program to develop a vehicle class hierarchy in Java to demonstrate the concept of polymorphism.
14. Write a JAVA program to demonstrate user defined packages.
15. Write a JAVA program for abstract class to find areas of different shapes.
16. Write a JAVA program for creation of Java Built-in Exceptions

17. Write a JAVA program for creation of User Defined Exception
18. Write a JAVA program that creates 3 threads by extending Thread class. First thread displays “Good Morning” every 1 sec, the second thread displays “Hello” every 2 seconds and the third displays “Welcome” every 3 seconds. (By implementing Runnable interface).
19. Write a program to read contents from a file using BufferedInputStream.
20. Write a program to read contents from a web page using HttpClient and Buffered Reader and write them to a local file using BufferedWriter.
21. Write a program to read two numbers and one operator from user console and perform the calculation.
22. Write a JAVA program to get sub list from ArrayList.
23. Write a JAVA program to iterate all elements of a list in both directions.
24. Write a JAVA program to add all elements of a list to LinkedList.
25. Write a JAVA program to implement the basic operations on TreeMap.

**Text Books:**

1. Herbert Schildt: “Java The complete reference”, 8th Edition, Tata McGraw Hill, 2017.
2. E. Balaguruswamy: “Programming with Java A Primer”, 5th Edition, Tata McGraw Hill, 2017.

<b>III SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	-	-	<b>4</b>	<b>2</b>
<b>20IT3S01 : DATA ANALYSIS AND VISUALIZATION LAB</b>				

**COURSE OUTCOMES:**

After the completion of this course, students will be able to know

1. How to present data using some of the data visualization libraries in Python, including Matplotlib, Seaborn and Folium
2. How to use basic visualization tools, including area plots, histograms, and bar charts
3. How to use specialized visualization tools, including pie charts, box plots, scatter plots and bubble plots
4. How to use advanced visualization tools, including waffle charts, word clouds and Seaborn and regression plots
5. How to create maps and visualize geospatial data

**Unit – I:**

**Introduction to spreadsheets:** Reading data, manipulating data. Basic spreadsheet operations and functions.

**Introduction to Business analytics:** Introduction, Types of Analytics, Area of Analytics.

**Unit – II:**

**Spreadsheet Functions to Organize Data:** Conditional formatting, Logical functions: Lookup and reference functions, IF, Nested IF, VLOOKUP, HLOOKUP, MATCH, INDEX and OFFSET functions in Excel.

**Statistical functions:** Introduction, SUMIFS, COUNTIF, PERCENTILE, QUARTILE, STDEV, MEDIAN and RANK Function

**Unit – III:**

**Introduction to Visualization Tools:** Introduction to Data Visualization, Introduction to Matplotlib, Basic Plotting with Matplotlib, Dataset on Immigration to Canada, Line Plots

**Unit – IV:**

**Basic and Specialized Visualization Tools**

Area Plots, Histograms, Bar Charts, Pie Charts, Box Plots, Scatter Plots, Bubble Plots

**Advanced Visualization Tools**

Waffle Charts, Word Clouds, Seaborn and Regression Plots

**Unit – V: Creating Maps and Visualizing Geospatial Data**

Introduction to Folium, Maps with Markers, Choropleth Maps

**TEXT BOOKS:**

1. **Data Analysis And Visualization Using Python: Analyze Data To Create Visualizations For Bi Systems** by Dr. Ossama Embarak, Apress, 2019.
2. **Data Analytics and Visualization: Understand, evaluate, and visualize data** by Phuong Vo.T.H, Martin Czygan, Ashish Kumar, Kirthi Raman, Packt Publishing Limited, 2017.

<b>III SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>2</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>20CE3M01 – ENVIRONMENTAL SCIENCE</b>				

**UNIT-I: Multidisciplinary nature of Environmental Studies:**

Definition, Scope and Importance –Sustainability: Stockholm and Rio Summit–Global Environmental Challenges: Global warming and climate change, acid rains, ozone layer depletion, population growth and explosion, effects;. Role of information technology in environment and human health.

Ecosystems: Concept of an ecosystem. - Structure and function of an ecosystem; Producers, consumers and decomposers. - Energy flow in the ecosystem - Ecological succession. - Food chains, food webs and ecological pyramids; Introduction, types, characteristic features, structure and function of Forest ecosystem, Grassland ecosystem, Desert ecosystem, Aquatic ecosystems.

**UNIT-II: Natural Resources:**

Natural resources and associated problems. Forest resources: Use and over – exploitation, deforestation – Timber extraction – Mining, dams and other effects on forest and tribal people.

Water resources: Use and over utilization of surface and ground water – Floods, drought, conflicts over water, dams – benefits and problems.

Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources.

Food resources: World food problems, changes caused by non-agriculture activities-effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity.

Energy resources: Growing energy needs, renewable and non-renewable energy sources use of alternate energy sources.

Land resources: Land as a resource, land degradation, Wasteland reclamation, man induced landslides, soil erosion and desertification; Role of an individual in conservation of natural resources; Equitable use of resources for sustainable lifestyles.

**UNIT-III: Biodiversity and its conservation:**

Definition: genetic, species and ecosystem diversity-classification - Value of biodiversity: consumptive use, productive use, social-Biodiversity at national and local levels. India as a mega-diversity nation - Hot-spots of biodiversity - Threats to biodiversity: habitat loss, man-wildlife conflicts. - Endangered and endemic species of India – Conservation of biodiversity: conservation of biodiversity.

**UNIT – IV Environmental Pollution:**

Definition, Cause, effects and control measures of Air pollution, Water pollution, Soil pollution, Noise pollution, Nuclear hazards. Role of an individual in prevention of pollution. - Pollution case studies, Sustainable Life Studies. Impact of Fire Crackers on Men and his wellbeing.

Solid Waste Management: Sources, Classification, effects and control measures of urban and industrial solid wastes. Consumerism and waste products, Biomedical, Hazardous and e – waste management.

**UNIT – V Social Issues and the Environment:**

Urban problems related to energy -Water conservation, rain water harvesting-Resettlement and rehabilitation of people; its problems and concerns. Environmental ethics: Issues and possible solutions. Environmental Protection Act -Air (Prevention and Control of Pollution) Act. –Water (Prevention and control of Pollution) Act -Wildlife Protection Act -Forest Conservation Act-Issues involved in enforcement of environmental legislation. -Public awareness.

Environmental Management: Impact Assessment and its significance various stages of EIA, preparation of EMP and EIS, Environmental audit. Ecotourism, Green Campus – Green business and Green politics.

The student should Visit an Industry / Ecosystem and submit a report individually on any issues related to Environmental Studies course and make a power point presentation.

**Text Books:**

1. K. V. S. G. Murali Krishna , Environmental Studies,VGS Publishers, Vijayawada, 2010
2. R. Rajagopalan, Environmental Studies, 2nd Edition, Oxford University Press, 2011
3. P. N. Palanisamy, P. Manikandan, A. Geetha, and K. Manjula Rani, Environmental Studies, 2nd Edition , Pearson Education, Chennai,2015

**Reference:**

<b>IV SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20MA4T07 : PROBABILITY &amp; STATISTICS</b>				

Course Objectives:

1. To familiarize the students with the foundations of probability and statistical methods
2. To impart probability concepts and statistical methods in various applications of Engineering
3. To introduce the correlation and regression and method of least squares

Course Outcomes:

At the end of this unit, the student will be able to

1. Make use of the concepts of probability and their applications (k3)
2. Apply discrete and continuous probability distributions (K3)
3. Use the components of a classical hypotheses test (K3)
4. Examine Significance tests based on small and large sampling tests (K3)
5. Use correlation methods and principle of least squares, regression lines (K3)

**UNIT-1 PROBABILITY:** Probability, probability axioms, addition law and multiplicative law of probability, conditional probability, Baye’s theorem, random variables (discrete and continuous), probability density functions, properties, mathematical expectation.

Learning Outcomes:

At the end of this unit, the student will be able to

- define the terms trial, events, sample space ,probability and laws of probability (K1)
- make use of probabilities of events in finite sample space from experiments (K3)
- apply Baye’s theorem to real time problems(K3)
- explain the notion of random variable, distribution functions and expected value(K2)

**UNIT-2 PROBABILITY DISTRIBUTIONS:** Probability distributions: Binomial, Poisson and normal distribution –their properties.

Learning Outcomes:

At the end of this unit, the student will be able to

- apply Binomial and Poisson distributions for real data to compute probabilities, theoretical frequencies (K3)
- interpret the properties of normal distribution and its applications (K2)

**UNIT-3 SAMPLING DISTRIBUTION AND TESTING OF HYPOTHESIS, LARGE SAMPLE TESTS:** Basic terminology in sampling, sample techniques (with and without replacement), sampling distribution of means for large and small samples (with known and unknown variance).Formulation of null hypothesis, alternative hypothesis, the critical and acceptance regions, level of significance, two types of errors.

Large Sample Tests: Test for single proportion, difference of proportions, test for single mean and difference of means. Confidence interval for parameters in one sample and two sample problems

Learning Outcomes:

At the end of this unit, the student will be able to

- explain the concept of sampling distribution for large and small samples (K2)
- apply the concept of hypothesis testing for large samples (K4)

**UNIT-4 SMALL SAMPLE TESTS:** Student t-distribution (test for single mean, two means and paired t-test), testing of equality of variances (F- test), Chi-square test for goodness of fit and independence of attributes.

Learning Outcomes:

At the end of this unit, the student will be able to

- apply the concept of testing of hypothesis for small samples to draw the inferences (K3)
- estimate the goodness of fit (K3)

**UNIT-5 CURVE FITTING AND CORRELATION:**

Curve Fitting: Method of least squares -Fitting a straight line, Second degree parabola –exponential curve-power curves

Correlation: Simple correlation, correlation coefficient (for ungrouped data), rank correlation.

Linear regression, regression lines, regression coefficients.

Learning Outcomes:

At the end of this unit, the student will be able to

- adopt correlation methods and principle of least squares and regression lines (K3)

Books:

1. Dr. K. Murugesan& P.Gurusamy, Probability and Statistics Anuradha Publications,2011
2. Dr.B.S.Grewal,Higher Engineering Mathematics, 43rd Edition, Khanna Publications 2012

<b>IV SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20CS4T01 : OPERATING SYSTEMS</b>				

## COURSE OUTCOMES

After the completion of the course the students are able to

1. Define the Basic concepts about Operating System and its functions.
2. Describe Process management, CPU scheduling and Deadlocks.
3. Analyze Memory management
4. Describe and Implement File systems & Disk Structures.
5. Perform Case Study on LINUX, WINDOWS and Android OS.

### UNIT – I:

#### OPERATING SYSTEMS OVERVIEW:

**Introduction:** OS Concepts – Evolution of OS, OS Structures- Kernel, Shell. Operating-System Services, System Calls, Types of System Calls, System Structure. UNIX- Introduction-Architecture, Logging In, Files and Directories, Input and Output, Programs and Processes, Error Handling, User Identification, Time Values, System Calls and Library Functions, Command-Line Arguments, UNIX File API'S.

### UNIT – II:

#### PROCESS MANAGEMENT:

**Process:** Concept, Operations on Processes, Inter Process Communication, Threads-Multithreading Models, Threading Issues, Pthreads.

**Synchronization:** The Critical-Section Problem, Peterson's Solution, Synchronization Hardware, Semaphores, Critical Regions, Monitors, Classic Problems of Synchronization,

**Process Scheduling:** Basic Concepts, Scheduling Criteria, Scheduling Algorithms- CPU (Uniprocessor) scheduling algorithms, Multiprocessor and Real-time scheduling algorithms.

**Deadlocks:** Characterization – Prevention – Avoidance - Detection and Recovery

### UNIT – III:

**MEMORY MANAGEMENT:** Basic Memory Management, Swapping, Contiguous Memory Allocation, Virtual Memory Concept, Demand Paging - Page Interrupt Fault, Page Replacement Algorithms, Segmentation – Simple, Multi-level, Segmentation with Paging, Memory Management.

### UNIT – IV:

#### INFORMATION MANAGEMENT:

**File system Interface:** The concept of a file, Access Methods, Directory structure, File system mounting, file sharing, protection.

**File System implementation:** File system structure, allocation methods, free-space management

**Mass-storage structure:** Overview of Mass-storage structure, Disk structure, disk attachment, disk scheduling, Disk Management, Swap-Space Management, RAID Structure.

**UNIT – V:**

**CASE STUDY:**

The Linux System, Microsoft Windows 7, Android Software Platform: Android Architecture, Operating System Services, Android Runtime Application Development, Application Structure.

**TEXT BOOKS:**

1. Abraham Silberschatz, Peter Baer Galvin and Greg Gagne, “Operating System Concepts”, 10th Edition, John Wiley and Sons Inc., 2018.
2. William Stallings, “Operating Systems– Internals and Design”, 7th Edition, Prentice Hall, 2016.
3. Alex A Aravind, Operating Systems-S Halder, Second Edition, Pearson Education, 2016.
4. Andrew Tanenbaum, Herbert Bos, “Operating Systems”, 4th Edition, 2015.

**REFERENCE BOOKS:**

1. Ann McIver McHoes Ida M. Flynn, “Understanding Operating Systems” Sixth Edition, Course Technology-Cengage Learning, 2011.
2. Andrew S. Tanenbaum, “Modern Operating Systems”, Second Edition, Addison Wesley, 2001.
3. Andrew S. Tanenbaum, Albert S. Woodhull - Amherst, “Operating Systems Design and Implementation”, Third Edition, Prentice Hall, 2006.
4. W. Richard Stevens, “Advanced Programming in UNIX Environment”, 2nd Ed, Pearson Education, 2005.
5. Terrence Chan, “UNIX System Programming Using C++”, Prentice Hall India, 1999.

<b>IV SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20IT4T03 : DATA BASE MANAGEMENT SYSTEMS</b>				

**COURSE OBJECTIVES:**

The objectives of the course is

1. To describe a sound introduction to the discipline of database management systems.
2. To give a good formal foundation on Entity- Relationship (E-R) model, the relational model of data and usage of Relational Algebra.
3. To introduce the concepts of basic SQL as a universal Database language.
4. To demonstrate the principles behind systematic database design approaches by covering conceptual design, logical design through normalization.
5. To provide an overview of transaction management, Database storage and indexing techniques.

**COURSE OUTCOMES**

Upon successful completion of this course, students should be able to:

- CO1: Explain the basic concepts of database management system and design an Entity-Relationship (E-R) model and convert E-R model to relational model.
- CO2: Construct database using Relational algebra and SQL.
- CO3: Apply Normalization techniques to normalize the database.
- CO4: Discuss transaction management using different concurrency control protocols and recovery algorithms.
- CO5: Illustrate different file organization and indexing methods.

**UNIT-1**

**Introduction**-Database System Applications, Purpose of Database Systems, View of Data - Data Abstraction, Instances and Schemas, Data Models, Database Languages , Database Architecture, Database Users and Administrators.

**Introduction to Database Design:** Database Design and ER Diagrams, Entities, Attributes and Entity sets, Relationships and Relationship sets, Additional features of ER Model, Conceptual Design with the ER Model.

**Relational Model:** Introduction to the Relational Model - Integrity Constraints over Relations. Enforcing Integrity constraints, querying relational data, Logical data base Design, Views.

**UNIT-II**

**Relational Algebra:** Relational Algebra - Selection and Projection, Set operations, Renaming, Joins, Division.

**SQL:** Form of Basic SQL Query - Examples of Basic SQL Queries, UNION, INTERSECT, and EXCEPT, Introduction to Nested Queries, Correlated Nested Queries, Set Comparison Operators, Aggregate Operators, NULL values - Comparison using Null values - Logical connectives - AND, OR and NOT - Outer Joins, Disallowing NULL values, Triggers.

### UNIT-III

**SCHEMA REFINEMENT AND NORMAL FORMS:** Introduction to Schema Refinement - Problems Caused by redundancy, Decompositions - Problem related to decomposition, Functional Dependencies - Reasoning about FDS, Normal Forms - FIRST, SECOND, THIRD Normal forms - BCNF - Properties of Decompositions - Loss less join Decomposition, Dependency preserving Decomposition, Multi valued Dependencies - FOURTH Normal Form, Join Dependencies, FIFTH Normal form.

### UNIT-IV

**Transaction Management** - The ACID Properties - Transactions and Schedules- Concurrent Execution of Transactions- Lock-Based Concurrency Control- 2PL, Serializability, and Recoverability- Dealing With Deadlocks - Concurrency Control without Locking.

**CRASH RECOVERY:** Introduction to ARIES- The Log - The Write-Ahead Log Protocol – Checkpoints - Recovering from a System Crash(ARIES) - Media Recovery.

### UNIT-V

**Overview of Storage and Indexing:** Data on External Storage, File Organization and Indexing- Clustered Indexes, Primary and Secondary Indexes, Index data Structures - Hash Based Indexing, Tree based Indexing, Comparison of File Organizations.

**Tree Structured Indexing:** Intuitions for tree indexes, Indexed Sequential Access Methods(ISAM), B+ Trees: A Dynamic Index Structure, Search, Insert, Delete.

#### EXT BOOKS:

1. Data base Management Systems, Raghurama Krishnan, Johannes Gehrke, McGrawHill Education, 3rd Edition, 2014.
2. Data base System Concepts, A.Silberschatz, H.F. Korth, S.Sudarshan, McGraw Hill, 6<sup>th</sup> edition, 2016.

#### Reference Books:

1. Fundamentals of Database Systems, RamezElmasri, Shamkant B Navathe-7<sup>th</sup> Edition, 2016.
2. Introduction to Database Systems, 8/e, C.J. Date, Pearson, 2012.
3. Database System Design, Implementation and Management, 5/e, Rob, Coronel, Thomson, 2012.

<b>IV SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20CC4T01 : AUTOMATA THEORY AND COMPILER DESIGN</b>				

**Course Objectives:**

1. To learn fundamentals of Regular and Context Free Grammars and Languages
2. To understand the relation between Regular Language and Finite Automata and machines
3. To learn how to design Automata's and machines as Acceptors, Verifiers and Translators
4. Understand the basic concept of compiler design, and its different phases which will be helpful to Construct new tools like LEX, YACC, etc.

**Course Outcomes:**

By the end of the course students can

1. Illustrate deterministic and non-deterministic finite state machines
2. Employ finite state machines to solve problems in computing using regular expressions
3. Demonstrate context free grammars and lexical analyzer of compiler design
4. Organize Syntax Analysis by Top down and Bottom up Parsing of compiler design
5. Analyze synthesized, inherited attributes and syntax directed translation schemes and determine Algorithms to generate code for a target machine

**UNIT-I**

Finite Automata: Need of Automata theory, Central Concepts of Automata Theory, Finite Automation, Transition Systems, Acceptance of a String, DFA, Design of DFAs, NFA, Design of NFA, Equivalence of DFA and NFA, Conversion of NFA into DFA, Finite Automata with  $\epsilon$ -Transitions, Minimization of Finite Automata, Finite Automata with output-Mealy and Moore Machines, Applications and Limitation of Finite Automata.

**UNIT-II**

Regular Expressions, Regular Sets, Identity Rules, Manipulations of REs, Equivalence between Finite Automata and Regular Expression, Inter conversion, Closure Properties of Regular Sets, Chomsky Hierarchy Classification of Grammars, Right and Left Linear Regular Grammars, Equivalence between Regular Grammar and Finite Automata, Inter Conversion.

**UNIT III**

Context Free Grammar, Leftmost and Rightmost Derivations, Parse Trees, Ambiguous Grammars, Simplification of Context Free Grammars- Elimination of Useless Symbols,  $\epsilon$ -Productions and Unit Productions, Normal Forms-Chomsky Normal Form and Greibach Normal Form, Applications of Context Free Grammars.

Lexical Analysis: Language Processors, Structure of a Compiler, Lexical Analysis, The Role of the Lexical Analyzer, Input Buffering, Specification of Tokens, Recognition of Tokens,

#### **UNIT IV**

Syntax Analysis: The Role of the Parser, Left Recursion, Left Factoring.

Top down Parsing: Pre Processing Steps of Top Down Parsing, Backtracking, Recursive Descent Parsing, Non-recursive Predictive Parsing, Error Recovery in Predictive Parsing.

Bottom Up Parsing: Introduction, Difference between LR and LL Parsers, Types of LR Parsers, Shift Reduce Parsing, SLR Parsers, Construction of SLR Parsing Tables, Construction of CLR (1) and LALR Parsing Tables.

#### **UNIT V**

Intermediate Code Generation: Variants of Syntax Trees, Three Address Code, Types and Declarations, Translation of Expressions, Intermediate Code for Procedures.

Code Optimization: The Principle Sources of Optimization, Basic Blocks, Optimization of Basic Blocks, Structure Preserving Transformations, Flow Graphs, Loop Optimization, Data-Flow Analysis, Peephole Optimization.

Code Generation: Issues in the Design of a Code Generator, Object Code Forms, Code Generation Algorithm, Register Allocation and Assignment.

#### **Text Books:**

- 1) Introduction to Automata Theory, Languages and Computation, J. E. Hopcroft, R. Motwani and J. D. Ullman, 3rd Edition, Pearson, 2008
- 2) Theory of Computer Science-Automata, Languages and Computation, K. L. P. Mishra and N. Chandrasekharan, 3rd Edition, PHI, 2007
- 3) Compilers: Principles, Techniques and Tools, Second Edition, Alfred V. Aho, Monica S. Lam, Ravi Sethi, Jeffrey D. Ullman, Pearson Publishers, 2007.

#### **Reference Books:**

- 1) Introduction to Automata and Compiler Design, Dasaradh Ramaiah K, PHI
- 2) Elements of Theory of Computation, Lewis H.P. & Papadimition C.H., Pearson /PHI
- 3) Theory of Computation, V. Kulkarni, Oxford University Press, 2013
- 4) Theory of Automata, Languages and Computation, Rajendra Kumar, McGraw Hill, 2014
- 5) Compiler Construction, Principles and Practice, Kenneth C Loudon, Cengage Learning, 2006
- 6). Modern compiler implementation in C, Andrew W Appel, Revised edition, Cambridge University Press.
- 7). Optimizing Compilers for Modern Architectures, Randy Allen, Ken Kennedy, Morgan Kauffmann, 2001.
- 8) Levine, J.R., T. Mason and D. Brown, Lex and Yacc, edition, O'Reilly & Associates, 1990

<b>IV SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	<b>3</b>	<b>-</b>	<b>-</b>	<b>3</b>
<b>20CC4T02 : FUNDAMENTALS OF CYBER SECURITY</b>				

**COURSE OBJECTIVE**

This course will enable the students:

1. To familiarize various types of cyber-attacks and cyber-crimes.
2. To give an overview of the cyber laws.
3. To study defensive techniques against these attacks.
4. To study cyber security challenges and implications.
5. To know about cyber security.

**COURSE OUTCOMES**

After completion of this course, the students shall be able to:

1. Understand, appreciate, employ, design and implement appropriate security technologies and policies to protect computers and digital information.
2. Identify & Evaluate Information Security threats and vulnerabilities in Information Systems and apply security measures to real time scenarios
3. Identify common trade-offs and compromises that are made in the design and development process of Information Systems
4. Demonstrate the use of standards and cyber laws to enhance information security in the development process and infrastructure protection
5. Illustrate the cybercrime & cyber terrorism and to know about the privacy issues

**UNIT-I**

**Introduction to Cyber Security:** Basic Cyber Security Concepts, layers of security, Vulnerability, threat, Harmful acts, Internet Governance – Challenges and Constraints, Computer Criminals, CIA Triad, Assets and Threat, motive of attackers, active attacks, passive attacks, Software attacks, hardware attacks, Spectrum of attacks, Taxonomy of various attacks, IP spoofing, Methods of defense, Security Models, risk management, Cyber Threats-Cyber Warfare, Cyber Crime, Cyber terrorism, Cyber Espionage, etc., Comprehensive Cyber Security Policy.

**UNIT-II**

**Cyberspace and the Law & Cyber Forensics:** Introduction, Cyber Security Regulations, Roles of International Law. The INDIAN Cyberspace, National Cyber Security Policy. Introduction, Historical background of Cyber forensics, Digital Forensics Science, The Need for Computer Forensics, Cyber Forensics and Digital evidence, Forensics Analysis of Email, Digital Forensics Lifecycle, Forensics Investigation, Challenges in Computer Forensics, Special Techniques for Forensics Auditing.

**UNIT-III**

**Cybercrime:** Mobile and Wireless Devices: Introduction, Proliferation of Mobile and Wireless Devices, Trends in Mobility, Credit card Frauds in Mobile and Wireless Computing Era, Security Challenges Posed by Mobile Devices, Registry Settings for Mobile Devices, Authentication service Security, Attacks on Mobile/Cell Phones, Mobile Devices: Security Implications for Organizations, Organizational Measures for Handling Mobile, Organizational Security Policies and Measures in Mobile Computing Era, Laptops.

#### **UNIT-IV**

**Cyber Security:** Organizational Implications: Introduction cost of cybercrimes and IPR issues, web threats for organizations, security and privacy implications, social media marketing: security risks and perils for organizations, social computing and the associated challenges for organizations.

#### **UNIT-V**

**Cybercrime and Cyber terrorism:** Introduction, intellectual property in the cyberspace, the ethical dimension of cybercrimes the psychology, mindset and skills of hackers and other cyber criminals.

**Privacy Issues:** Basic Data Privacy Concepts: Fundamental Concepts, Data Privacy Attacks, Data linking and profiling, privacy policies and their specifications, privacy policy languages, privacy in different domains- medical, financial, etc.

#### **TEXT BOOK:**

1. Nina Godbole and Sunit Belpure, Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives, Wiley
2. B. B. Gupta, D. P. Agrawal, Haoxiang Wang, Computer and Cyber Security: Principles, Algorithm, Applications, and Perspectives, CRC Press, ISBN 9780815371335, 2018.

#### **REFERENCES:**

1. Cyber Security Essentials, James Graham, Richard Howard and Ryan Otson, CRC Press.
2. Introduction to Cyber Security, Chwan-Hwa(john) Wu, J. David Irwin, CRC Press T&F Group.

IV SEMESTER	L	T	P	C
	3	-	-	3

**20IT4L03 : OPERATING SYSTEMS LAB IN LINUX**

### COURSE OUTCOMES

At the end of the lab student is able to

1. Acquire basic knowledge in Linux operating System
2. Understand concepts of CPU Scheduling.
3. Describe process management, scheduling and concurrency control mechanisms.
4. Analyze Page Replacements and deadlocks.
5. Compare various file systems and its operating systems examples

### List of Experiments:

1. Execution of various file/directory handling commands in Linux.
2. To study the various commands operated in vi editor in LINUX.
3. To study the various File Access Permission and different types users in LINUX
4. Simulate First Come First Serve CPU scheduling algorithm.
5. Simulate Shortest Job First CPU scheduling algorithm.
6. Simulate Priority CPU scheduling algorithm.
7. Simulate Round Robin CPU scheduling algorithm.
8. Simulate Sequential file allocation strategy.
9. Simulate Linked file allocation strategy.
10. Simulate Indexed file allocation strategy.
11. Simulate First In First Out page replacement algorithm.
12. Simulate Least Recently used page replacement algorithm.
13. Simulate Optimal page replacement algorithm.
14. Write Programs to simulate free space management.
15. Simulate Bankers Algorithm for Dead Lock Avoidance.

IV SEMESTER	L	T	P	C
	-	-	3	1.5

**20IT4L02 : DATA BASE MANAGEMENT SYSTEMS LAB**

**COURSE OUTCOMES:**

After the completion of the` course the students are able to

CO1: Define, manipulate and control data using Structured Query Language (SQL).

CO2: Enforce Database Integrity Constraints.

CO3: Implement SQL Queries using set operators, sub queries, nested queries, aggregate functions, other SQL functions and views.

CO4: Develop applications using various features of PL/SQL like Functions, Procedures, Packages, cursors and triggers.

CO5. Develop Database system to handle the real world problem.

**LIST OF EXPERIMENTS:**

1. DDL and DML Commands.
2. Restricting and storing the Data using Key constraints. And displaying Data from Multiple Tables using SELECT command.
3. Queries (along with sub Queries and nested Queries) using ANY, ALL, IN, EXISTS, NOTEXISTS, UNION, INTERSECT.
4. Queries using Aggregate functions (COUNT, SUM, AVG, MAX and MIN), GROUP by, HAVING Clause.
5. Creation and dropping of Views.
6. Queries using Conversion functions (to char, to number and to date), string functions (Concatenation, lpad , rpad, ltrim, rtrim, lower, upper, initcap, length, substr and instr ), date functions (Sysdate, next day, add months, last day, months between, least, greatest, trunc, round, to char, to date).
  - (i) Creation of simple PL/SQL programs which includes declaration section, executable section and exception handling section.
  - (ii) Insert data into tables and use COMMIT, ROLLBACK and SAVEPOINT in PL/SQL block.
7. Develop a program that includes the features IF, NESTED IF, CASE and CASE expression.
8. Program development using simple loops, while loops, numeric for loops, nested loops.
9. ERROR Handling, BUILT-IN Exceptions, User defined Exceptions, RAISE- APPLICATION ERROR.
10. Programs development using creation of procedures, passing parameters IN and OUT of PROCEDURES.
11. Program development using creation of stored functions, invoke functions in SQL Statements and write complex functions.
12. Program development using creation of package specification, package bodies, private objects, package variables and calling stored packages.
13. Develop programs using Cursors.
14. Develop Programs using Triggers.

<b>IV SEMESTER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
	-	-	<b>3</b>	<b>1.5</b>
<b>20CC4L01 : CYBER SECURITY LAB</b>				

**Course Outcomes:**

1. Analyze and implement Audit security policy in windows environment, create a Demilitarized zone creation in Network environment
2. Illustrate the Resource harvesting attack and mitigation, Window Patch management policy, Trojans and mitigation strategies
3. Apply the knowledge of metasploit, Access control list creation and content filtering limiting the traffic
4. Explain the Data leakage in a website database, Password policy and verification, Patch management using MBSA tool on windows machine
5. Build an Audit Policy management, Media handling policy and event log analysis and Installation of Trojan, Network DOS attack and proof of bandwidth utilization

**Lab Experiments:**

1. Audit security policy implementation in windows environment.
2. Create a Demilitarized zone creation in Network environment for information security.
3. Implement Resource harvesting attack and mitigation.
4. Implement Window Patch management policy.
5. Knowing the Behavior of Trojans and mitigation strategies.
6. Create a metasploit and make it to implement.
7. Access control list creation and content filtering limiting the traffic.
8. Data leakage in a website database and preventive measures.
9. Password policy implementations and verification.
10. Patch management implementation using MBSA tool on windows machine
11. Audit Policy management for users and computers log analysis.
12. Media handling policy implementation and event log analysis.
13. Installation of Trojan and study of different options.
14. Network DOS attack and proof of bandwidth utilization and preventive steps.

IV SEMESTER	L	T	P	C
	-	-	4	2

---

<b>20CC4S01 : FULL STACK DEVELOPMENT LAB</b>
--

**Course Objectives:**

The objective of this lab is to provide understanding about the core concepts of frontend programming for web application and to build strong foundation of JavaScript which will help developer to apply JavaScript concepts for responsive web frontend development.

**Course Outcomes:**

**By the end of this lab the student is able to**

1. Analyze a web page and identify its elements and attributes.
2. Demonstrate the important HTML tags for designing static pages and separate design from content using Cascading Style sheet
3. Implement MVC and responsive design to scale well across PC, tablet and Mobile Phone
4. Create web pages using HTML and Cascading Style Sheets.
5. Develop major Web application tier- Client side development
6. Participate in the active development of cross-browser applications through JavaScript
7. Develop JavaScript applications that transition between states

**Perform experiments related to the following concepts:**

**A) HTML**

- 1) Introduction to HTML
- 2) Browsers and HTML
- 3) Editor's Offline and Online
- 4) Tags, Attribute and Elements
- 5) Doctype Element
- 6) Comments
- 7) Headings, Paragraphs, and Formatting Text
- 8) Lists and Links
- 9) Images and Tables

**B) CSS**

- 1) Introduction CSS
- 2) Applying CSS to HTML
- 3) Selectors, Properties and Values
- 4) CSS Colours and Backgrounds
- 5) CSS Box Model
- 6) CSS Margins, Padding, and Borders
- 7) CSS Text and Font Properties
- 8) CSS General Topics

### **C) Java Script**

- 1) Introduction to JavaScript
- 2) Applying JavaScript (internal and external)
- 3) Understanding JS Syntax
- 4) Introduction to Document and Window Object
- 5) Variables and Operators
- 6) Data Types and Num Type Conversion
- 7) Math and String Manipulation
- 8) Objects and Arrays
- 9) Date and Time
- 10) Conditional Statements
- 11) Switch Case
- 12) Looping in JS
- 13) Functions

IV SEMESTER	L	T	P	C
	1	-	-	-

**20BM4M01 : INDIAN CONSTITUTION**

**UNIT I:** Introduction to Indian Constitution-Constitution meaning of the term, Indian Constitution - Sources and constitutional history, Features - Citizenship, Preamble, Fundamental Rights and Duties, Directive Principles of State Policy.

**UNIT II:** Union Government and Administration Structure of the Indian Union: Federalism, Centre State relationship, President: Role, powers and position, PM and Council of ministers, Cabinet and Central Secretariat, Lok Sabha, Rajya Sabha, The Supreme Court and High Court: Powers and Functions

**UNIT III:** State Government and its Administration Governor - Role and Position - CM and Council of ministers, State Secretariat: Organisation, Structure and Functions

**UNIT IV:** Local Administration - District's Administration Head - Role and Importance, Municipalities - Mayor and role of Elected Representative - CEO of Municipal Corporation PachayatiRaj: Functions of Pachayat Raj Institution: Zila Panchayat, Elected officials and their roles, CEO Zila Panchayat: Block level Organizational Hierarchy - (Different departments), Village level - Role of Elected and Appointed officials - Importance of grass root democracy.

**UNIT V:** Election Commission: Election Commission- Role of Chief Election Commissioner and Election Commissionerate -State Election Commission: Functions of Commissions for the welfare of SC/ST/OBC and women.

**TEXTBOOKS:**

1. Durga Das Basu, Introduction to the Constitution of India, Prentice Hall of India Pvt. Ltd.
2. SubashKashyap, Indian Constitution, National Book Trust
3. J.A. Siwach, Dynamics of Indian Government & Politics

**REFERENCE BOOKS:**

1. D.C. Gupta, Indian Government and Politics
2. H.M.Sreevai, Constitutional Law of India, 4th edition in 3 volumes (Universal Law Publication)
3. J.C. Johari, Indian Government andPolitics Hans
4. J. Raj IndianGovernment and Politics
5. M.V. Pylee, Indian Constitution Durga Das Basu, Human Rights in Constitutional Law, Prentice – Hall of India Pvt. Ltd.. New Delhi
6. Noorani, A.G., (South Asia Human Rights Documentation Centre), Challenges to Civil Right), Challenges to Civil Rights Guarantees in India, Oxford University Press 2012.
