

SWARNANDHRA COLLEGE OF ENGINEERING AND TECHNOLOGY

(Autonomous)

Narsapur, West Godavari District, A.P. 534280

DEPARTMENT OF MECHANICAL ENGINEERING

LESSON PLAN

Course Code	Course Title	Semester	Branch	Conduct Periods /Week	A.Y	Date of commencement of Semester	
23ME5T02	THERMAL ENGINEERING	V	Mechanical Engineering	5	2026-27	22 -06 -2026	
COURSE OUTCOMES							
CO1	Summarize the principles and compare the performance of engine cycles						
CO2	Analyze the performance characteristics of internal combustion engines and boilers						
CO3	Demonstrate the working of steam nozzles, turbines, and condensers.						
CO4	Apply the principles to determine the efficiency of compressors and gas turbines.						
CO5	Distinguish between different types of jet propulsion and rocket systems						
CO6	Describe the performance of solar energy systems and its applications						
UNIT	Out Comes/ Blooms Level	Ref. No.	Topics/Activity Air standard Cycles:	Text Book /Reference	Conduct Hour	Delivery Method	
I	CO1: Summarize the principles and compare the performance of engine cycles.	UNIT -I (Air standard Cycles & Actual Cycles and their Analysis)					Chalk& Talk, PPT, Think, pair share (active learning Method)
		1.1	Otto Cycle with P-V & T-s diagrams - and thermal efficiency - mean effective pressure	T ₁ & T ₂	1		
		1.2	Diesel Cycle with P-V & T-s diagrams - and thermal efficiency	T ₁ &T ₂	1		
		1.3	Dual Combustion cycle with P-V & T-S diagrams - and Thermal Efficiency	T ₁	1		
		1.4	Comparison of Otto, Diesel and Dual Cycles, Brayton Cycle with P-V & T-S diagrams - and thermal efficiency.	T ₁ & R ₁	1		
		1.5	Introduction, Comparison of Air standard and actual cycles	T ₁ & R ₁	1		
		1.6	Time loss factor, Heat loss factor	T ₂ & R ₂	1		
		1.7	Exhaust blow down, loss due to gas exchange process	T ₂ & R ₂	1		
		1.8	Volumetric Efficiency	T ₁ & T ₂	1		
		1.9	Loss due to Rubbing Friction	T ₁ & T ₂	1		
		1.10	Actual & fuel Air Cycles of CI Engines.	T ₁ , & R ₁	1		
Total					10		
II	CO2: Analyze the performance characteristics of internal combustion engines and boilers	UNIT-II (I.C. Engines & Boilers)					
		2.1	Classification & Working principles of I.C. Engines – four stroke petrol engine with theoretical and actual P-V diagrams	T ₁ & T ₂	1		
		2.2	Four stroke Diesel engine with theoretical and actual P-V diagrams	T ₁ & R ₁	1		
		2.3	Two stroke petrol engine & Diesel engine	T ₁ & R ₁	1		
		2.4	Comparison between two stroke and four stroke engine and petrol and diesel engines	T ₁ & R ₁	1		

		2.5	Valve & Port Timing Diagram	T ₁ & R ₁	1	Chalk& Talk, &PPT, Videos. Model based learning (active learning Method)
		2.6	Engine systems – Fuel system-in petrol and diesel engine – working principle of simple Carburetor and fuel injector	T ₁ & R ₁	1	
		2.7	Ignition system	T ₁ & R ₁	1	
		2.8	Cooling system	T ₁ & R ₁	1	
		2.9	Lubrication system	T ₁ & R ₁	1	
		2.10	Principles of super charging & Turbo Charging	T ₁ & R ₁	1	
		2.11	Boilers : Important terms, Classification, working principles of L.P. boilers	T ₁ & R ₁	2	
		2.12	Working principles of H.P boilers	T ₁ & R ₁	1	
		2.13	Boiler mountings and accessories	T ₁ & R ₁	1	
		2.14	Draught- induced and forced.	T ₁ & R ₁	1	
Total					15	
CO3: Demonstrate the working of steam nozzles, turbines, and condensers.	UNIT-III (Steam nozzle, Steam turbines and Steam condensers)					
	3.1	Steam nozzles: Functions, applications, types, flow through nozzles, ,.	T2& R ₁	1	Chalk& Talk, &PPT, Videos, Flipped class room (active learning method)	
	3.2	condition for maximum discharge	T2& R ₁	1		
	3.3	criteria to decide nozzle shape, Wilson line	T2& R ₁	1		
	3.4	Steam turbines: Classification – impulse turbine; velocity diagram, ,	T2& R ₁	1		
	3.5	Effect of friction, Diagram efficiency	T2& R ₁	1		
	3.6	De-leval turbine - methods to reduce rotor speed,	T2& R ₁	1		
	3.7	Combined velocity diagram.	T2& R ₁	1		
	3.8	Reaction turbine: Principle of operation, velocity diagram,	T2& R ₁	1		
	3.9	Parson's reaction turbine – condition for maximum efficiency	T2& R ₁	1		
	3.10	Steam condensers: Classification, working principles of different types	T2& R ₁	2		
	3.11	vacuum efficiency and condenser efficiency.	T2& R ₁	1		
	3.12	Problems	T2& R ₁	3		
Total					15	
IV	CO4: Apply the principles to determine the efficiency of compressors and gas turbines.	UNIT-IV (Air Compressors and Gas Turbines)				
		4.1	Air Compressors: function, applications and Classification, Reciprocating type Air Compressor- Working principles	T2& R ₁	1	
		4.2	Expression for equation of work without and with clearance volume .	T2& R ₁	1	
		4.3	Volumetric efficiency, clearance ratio, Multi-stage compression, Expression for equation of work for two stage compression.	T2& R ₁	1	
		4.4	Conditions for minimum work for two stage reciprocating type air compressor. Centrifugal Compressors: Principle,	T2& R ₁	1	

			velocity and pressure variation, velocity diagrams.			Chalk& Talk, &PPT, Videos, Think, pair share (active learning Method)
		4.5	Rotary type air compressors – Lysholm compressor – Working principle and efficiency considerations.	T2& R ₁	1	
		4.6	Roots blower compressor, Vane blower compressor – Working principle and efficiency considerations.	T2& R ₁	1	
		4.7	Axial flow Compressors: Working principle, pressure rise and efficiency calculations.	T2& R ₁	1	
		4.8	Gas Turbines: Applications, classification. Simple gas turbine plant – ideal cycle, components	T2& R ₁	1	
		4.9	Methods for Improvement of thermal efficiency of open cycle gas turbine plant-reheating.	T2& R ₁	1	
		4.10	Regeneration, Inter cooling	T2& R ₁	1	
		4.11	Methods for Improvement of thermal efficiency of Closed cycle gas turbine plant	T2& R ₁	1	
		4.12	Problems	T2& R ₁	2	
Total					13	
V	CO6: Describe the performance of solar energy systems and its applications CO5 :Distinguish between different types of jet propulsion and rocket systems	Jet Propulsion, Rockets and Solar Engineering:				
		5.1	Jet Propulsion: Principle, classification, Turbo jet engine – T-S diagram, performance evaluation	T2& R ₁	1	Chalk& Talk, &PPT, quiz (active learning Method
		5.2	Turbo prop engine – T-S diagram, performance evaluation	T2& R ₁	1	
		5.3	Ram-jet and pulse-jet engine – Working principle	T2& R ₁	1	
		5.4	Rockets: Working Principle, classification	T2& R ₁	1	
		5.5	Solid propellant rocket engines.	T2& R ₁	1	
		5.6	Liquid propellant rocket engines.	T2& R ₁	1	
		5.7	Solar radiation, Solar radiation at the earth Surface, Measurement of Solar radiation: Solar energy – Importance	R4	1	
		5.8	Solar collectors	R4	1	
		5.9	PV cells	R4	1	
		5.10	Storage methods and applications	R4	1	
Total					10	
CUMULATIVE PROPOSED PERIODS					63	
Text Books:						
S.No	Authors, Book Title, Edition, Publisher, Year of Publication					
T1	V. Ganesan, Internal Combustion Engines, 4 th Edition, Tata McGraw Hill, 2017					
T2	R. K. Rajput, Thermal Engineering,10 th Edition, Lakshmi Publications, 2018					

T3	R. S. Khurmi, & J S Gupta, Thermal Engineering, 5 th Edition, Chand, 2020
Reference Books:	
S.No	Authors, Book Title, Edition, Publisher, Year of Publication
R1	Mahesh M Rathore. Thermal Engineering-I, 4 th Edition, Tata McGraw Hill, 2018
R2	Rudramoorthy, Thermal Engineering, 4 th Edition, Tata McGraw-Hill Education India, 2010
R3	G.N. Tiwari, Solar Energy: Fundamentals, Design, Modeling and Applications, 5 th Edition, Narosa Publishing House, 2021
R4	S P Sukhatme , Solar Energy, 4 th Edition, Tata McGraw Hill, 2017
