

SWARNANDHRA
COLLEGE OF ENGINEERING & TECHNOLOGY (A)
SEETHARAMPURAM, NARSAPUR-534280.W.G.DT.
DEPARTMENT OF CIVIL ENGINEERING

Name of the Program: A Two-Day workshop on

“Integrated approaches to Water resources and Disaster Management”

Date: 18-08-2026 & 19-08-2026

Resource Person: D. Mohan Rao, Dy. Executive Engineer RWS&S, Water Grid Project,
West Godavari District

The outcome of the work shop is understanding integrated approaches to water resources and disaster management combining land, water, and risk reduction strategies. The focus from reactive emergency response to proactive, basin-wide planning and minimizing loss of life, property damage, and chronic shortages during floods and droughts.

The resource person enlightens about Integrated Water Resources Management (IWRM) as a coordinated process that promotes the joint management of water, land, and related resources, to maximize economic and social welfare fairly while protecting the long-term sustainability of vital ecosystems, moving away from old, separated sector management styles.
