Report on

A THREE-DAY WORKSHOP ON MECHATRONICS

Academic Year	2026-2027
Program Start Date	24/ 08/2026
Program Ending Date	26/08/2026
EVENT NAME	A THREE-DAY WORKSHOP ON MECHATRONICS
Number of students participated	54
Event faculty coordinator	Mr. N. BULLI RAJU, Assistant Prof., Dept. of ME

ABOUT WORKSHOP:

The workshop was conducted with the objective of providing students with practical and theoretical knowledge of **mechatronics, sensors, actuators, controllers, automation, and intelligent systems**. **Mr. Madhan Kumar M, R&D Engineer, Falcon IT Training and Educational Services LLP, Chennai**, served as the resource person and delivered technical sessions.

Objectives of the Workshop

1. **To provide practical knowledge of Mechatronics** by integrating mechanical, electronic, and intelligent systems.
2. **To develop hands-on skills** through hardware kits, real-time implementations, and interactive sessions.
3. **To introduce advanced concepts** in sensors, actuators, control systems, and automation.
4. **To enhance problem-solving and innovation skills** required for modern engineering applications.
5. **To prepare students for Industry 4.0 technologies** and intelligent manufacturing systems.

- The **first day** focused on the fundamentals of mechatronics, system integration, sensors, actuators, controllers, and feedback systems. Students learned how mechanical systems can be integrated with electronic and control technologies to develop automated systems.
- The **second day** emphasized **hands-on training** using hardware components, sensors, actuators, and real-time control systems. Students gained practical experience in sensing, processing, decision-making, and actuation.

- The **third day** focused on **automation, robotics, intelligent systems, and applications**. Students understood the practical importance of mechatronics in modern industries.

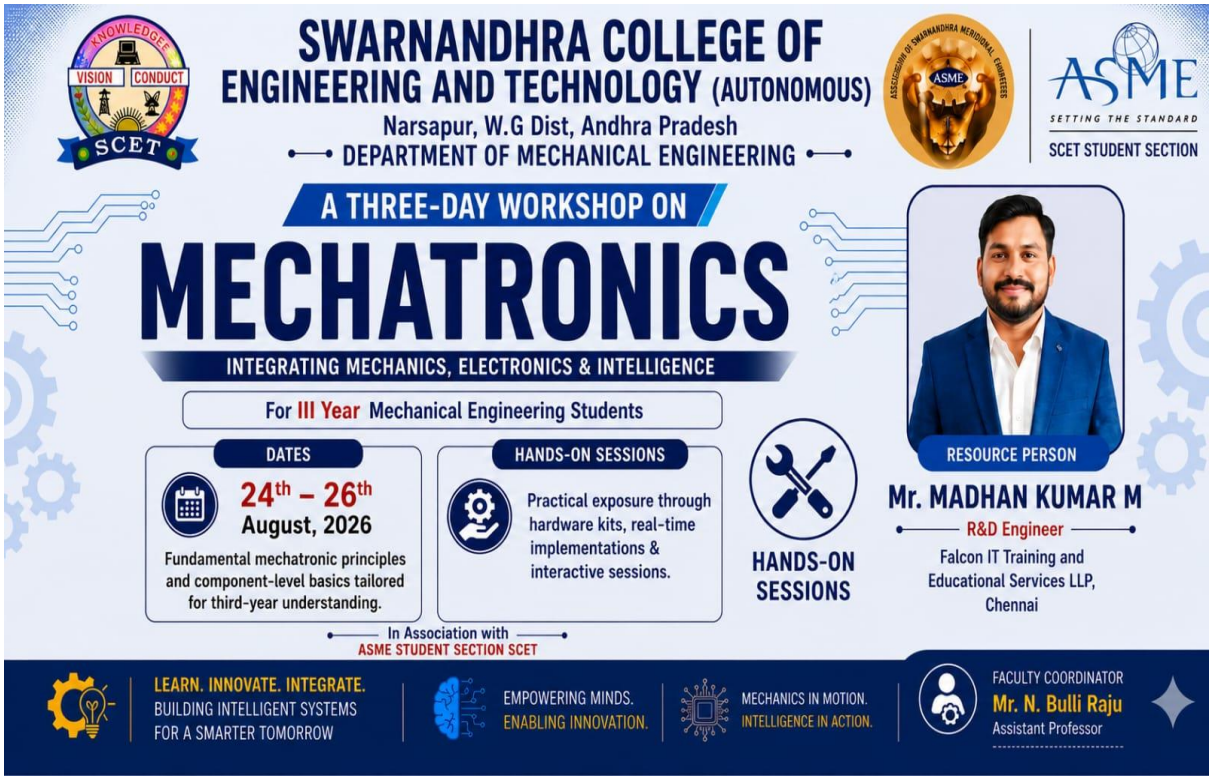

The workshop Was improved students' **technical knowledge, practical skills, troubleshooting ability, teamwork, logical thinking, and problem-solving skills**. It also helped them connect classroom concepts with real-world engineering applications and understand the importance of multidisciplinary knowledge.

The **Three-Day Workshop on Mechatronics** was successfully conducted from **24th to 26th August 2026** with 54 students registered and active participation from **54 III-Year Mechanical Engineering students**. The programme provided a valuable combination of theoretical knowledge, industrial insights, practical demonstrations, and hands-on experience.

The contribution of the resource person, **Mr. Madhan Kumar M**, and the coordination of **Mr. N. Bulli Raju, Assistant Professor, Department of Mechanical Engineering**, played an important role in the successful execution of the programme. The workshop fulfilled its objectives by providing students with practical and industry-oriented knowledge of mechatronics and by creating awareness of emerging technologies in automation and intelligent engineering systems. Overall, the programme was highly beneficial to the students and served as an effective platform for enhancing their technical competence, innovative thinking, and readiness to meet the requirements of modern engineering industries.

I extend my heartfelt thanks to our beloved management chairman Sri. K. Satyanarayana garu, Treasurer Sri K. V.Swamy garu, Director Sri A.srihari garu, Vice Principal sir Dr. A. Gopichand garu, and Head of the Department Dr. Francis Luther King garu, and all the professors, for their continued support and encouragement in conducted this Three-Day Workshop successfully.

STUDENTS FEED BACK:

1. The workshop objectives were clearly explained at the beginning.

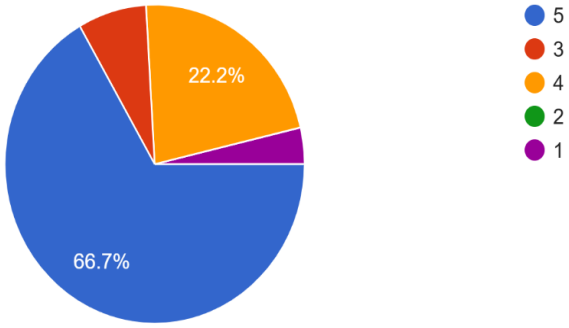

A. Workshop Learning & Course Outcomes (Feedback Statement) RATING: [5. Excellent Improvement. 4.Very Good Improvement. 3. Good Imp...jectives were clearly explained at the beginning.

54 responses

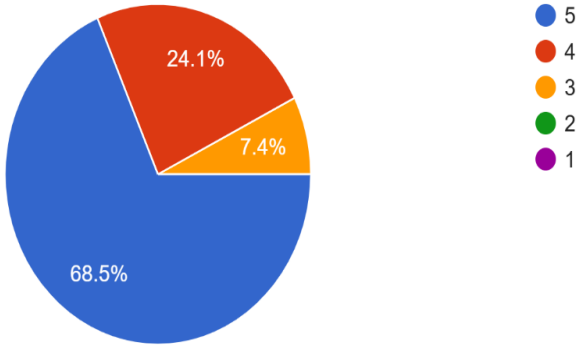

2. I gained a clear understanding of the fundamentals of Mechatronics.

54 responses

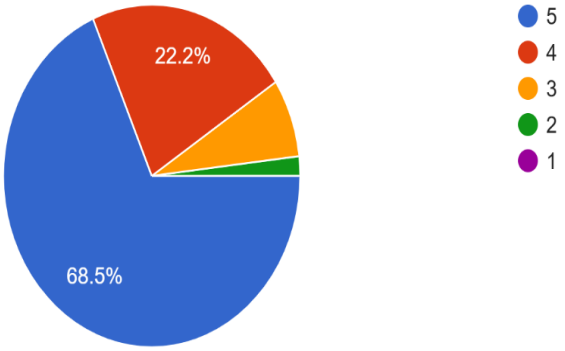

3. I understood the integration of mechanical, electrical/electronic and intelligent systems.

54 responses

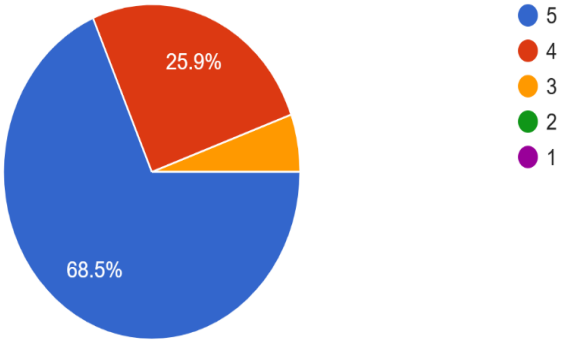

4. The workshop improved my understanding of sensors and actuators used in mechatronic systems.

54 responses

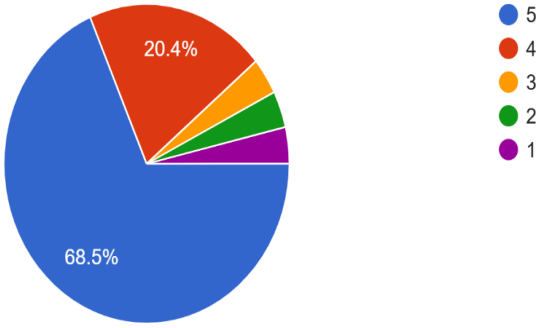

5. I gained practical knowledge through hands-on activities.

54 responses

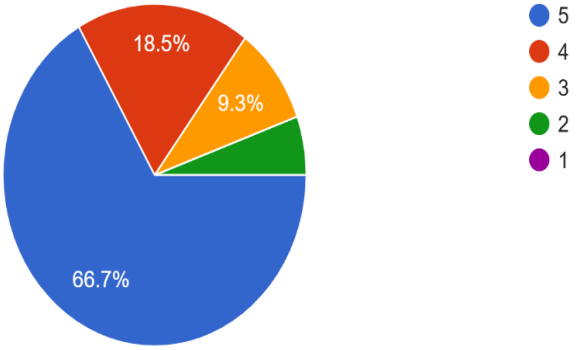

6.I can identify and select appropriate components for a basic mechatronic system.

54 responses

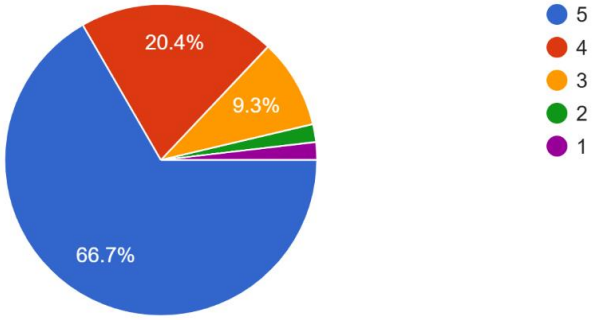

7. I developed confidence in interfacing hardware/components for a mechatronic application.

54 responses

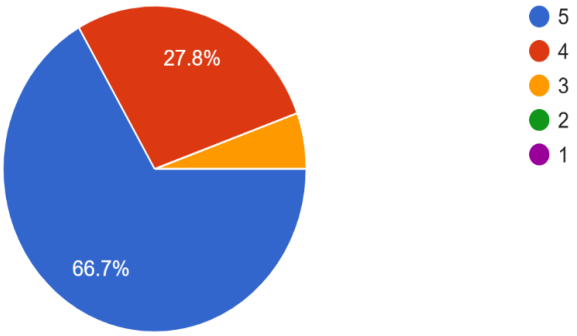

8. I can apply the concepts learned to solve basic engineering problems.

54 responses

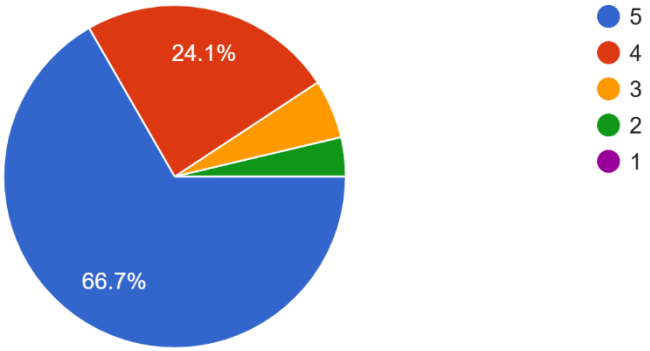

9. The practical sessions helped me connect theoretical concepts with real-world applications.

54 responses

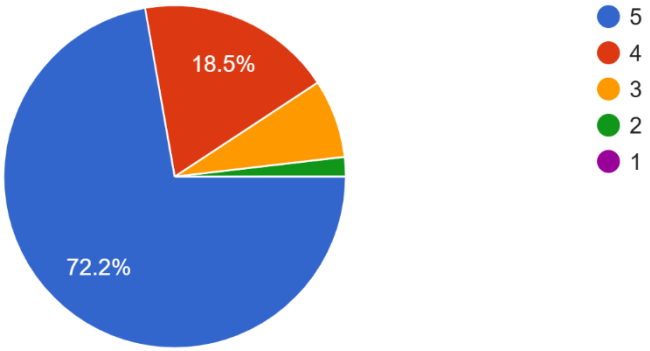

10. The workshop enhanced my ability to think about automation and intelligent engineering solutions.

54 responses

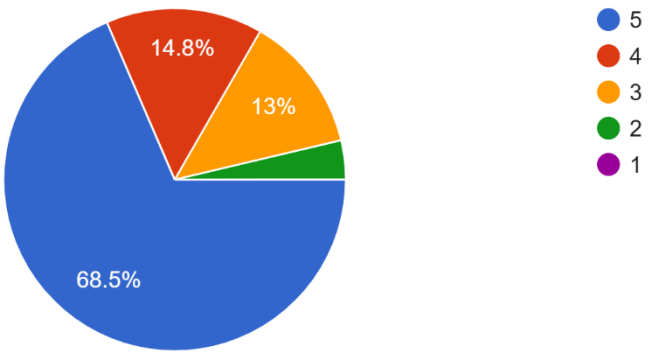

B. Hands-on Training 11.Adequate time was provided for hands-on practice.

54 responses

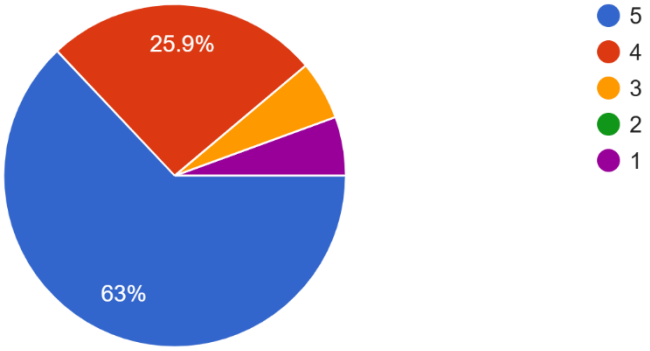

12.The practical demonstrations were easy to understand.

54 responses

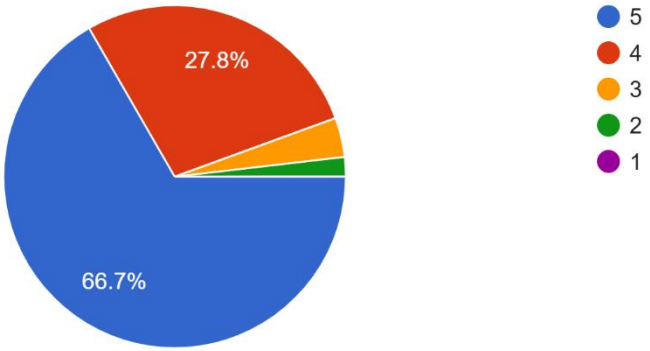

13. The hands-on activities were relevant to Mechanical Engineering applications.

54 responses

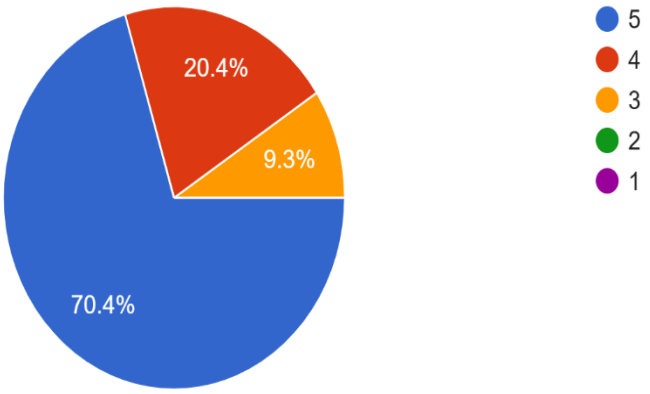

14. I was able to participate actively in the practical activities.

54 responses

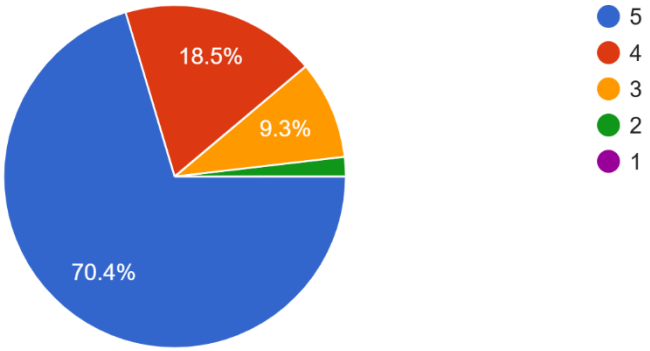

15. The workshop improved my ability to troubleshoot basic mechatronic systems.

54 responses

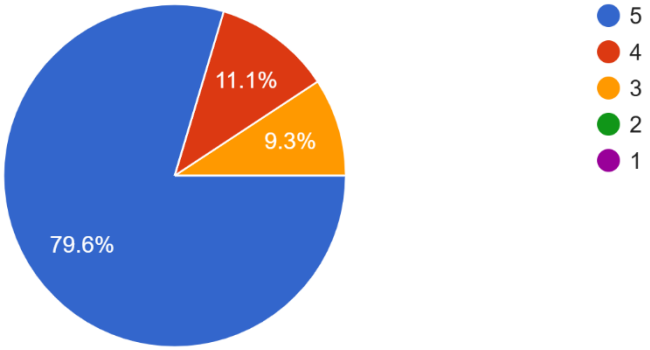

C. Resource Person & Delivery (Feedback Statement) 16.The resource person demonstrated strong technical knowledge.

54 responses

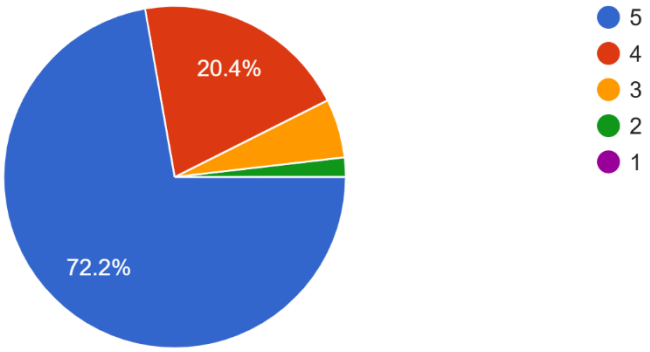

17. The concepts were explained clearly and systematically.

54 responses

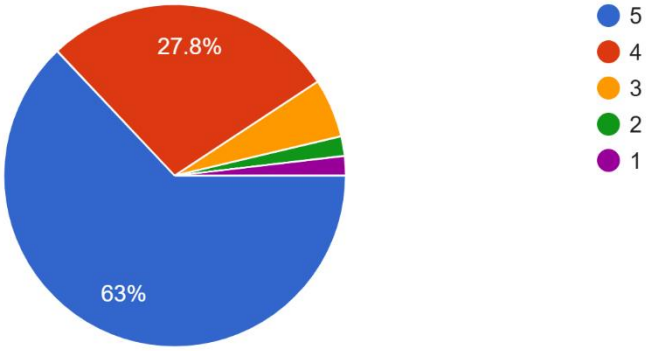

18. The resource person encouraged student interaction and participation.

54 responses

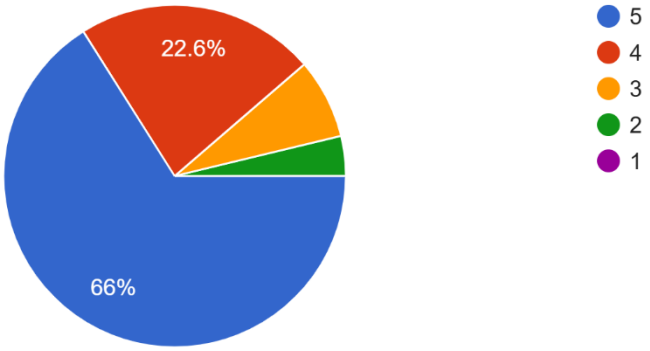

19. The demonstrations and examples were relevant to industry applications.

54 responses

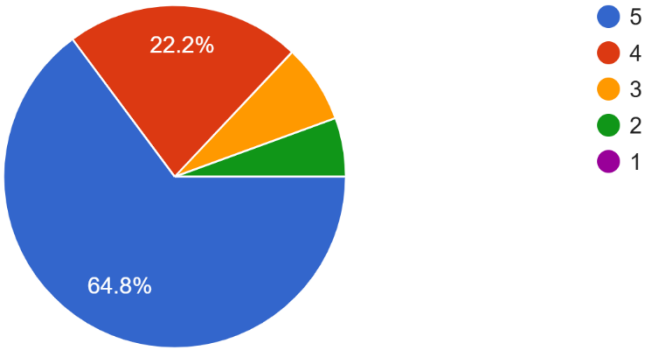

20. The resource person effectively addressed students' doubts and questions.

53 responses

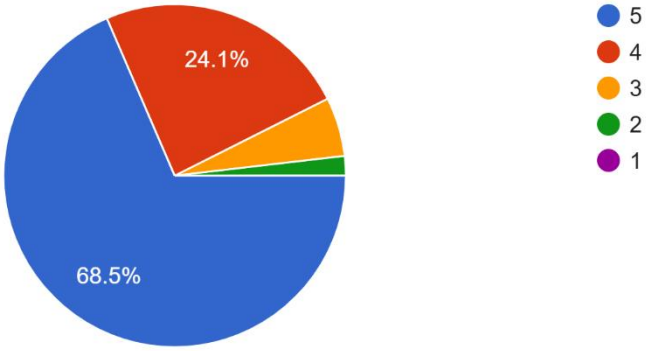

Workshop Organization (Feedback Statement) 21.The workshop was well organized.

54 responses

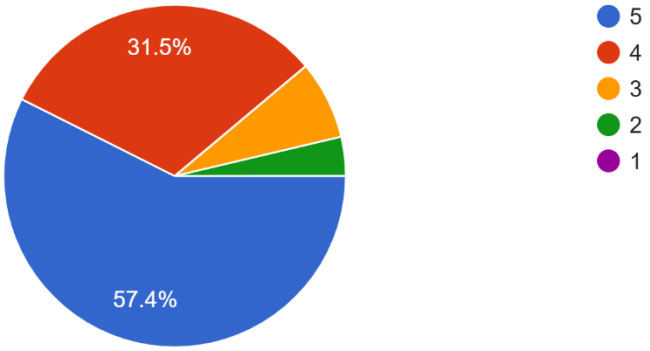

22. The duration of the workshop was appropriate

54 responses

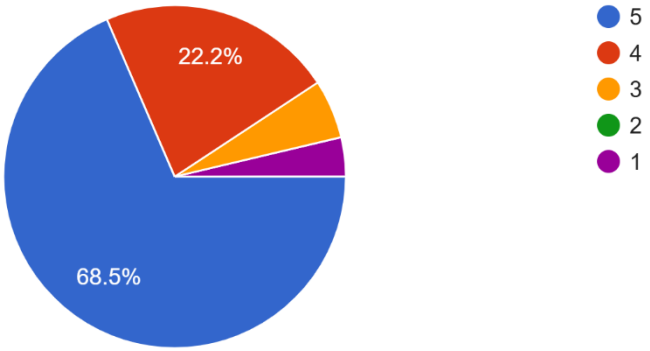

23. The venue and laboratory/technical facilities were adequate

54 responses

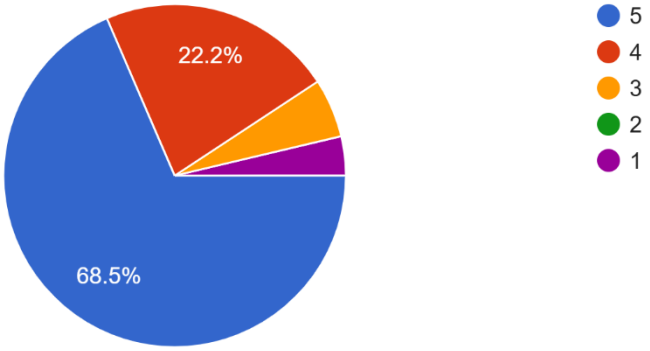

24. The workshop schedule was followed effectively

54 responses

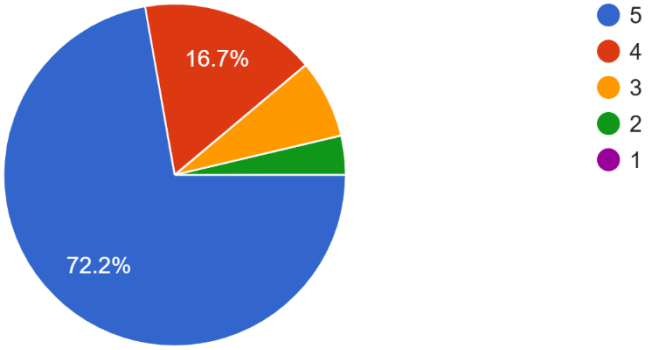

25. Overall, the workshop was useful for my academic and professional development.

54 responses

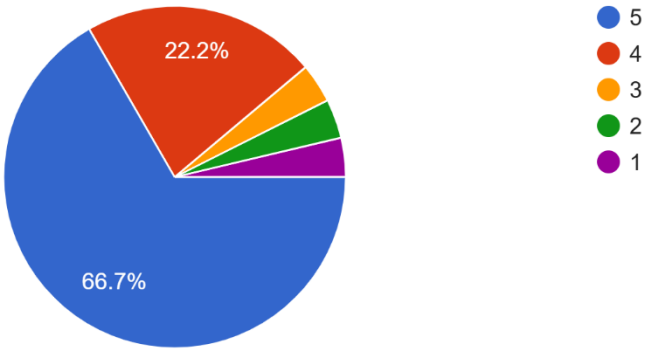

OBE-Oriented Outcome Assessment After attending this workshop, I am able to: 26.WLO1: Explain the basic principles and components of mechatronic systems.

54 responses

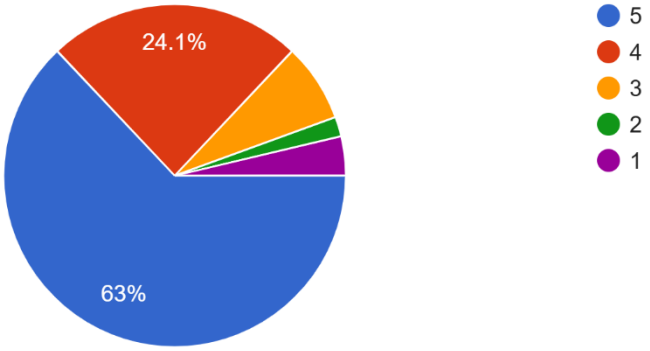

27. WLO2: Identify and integrate sensors, actuators and control elements in a basic system

54 responses

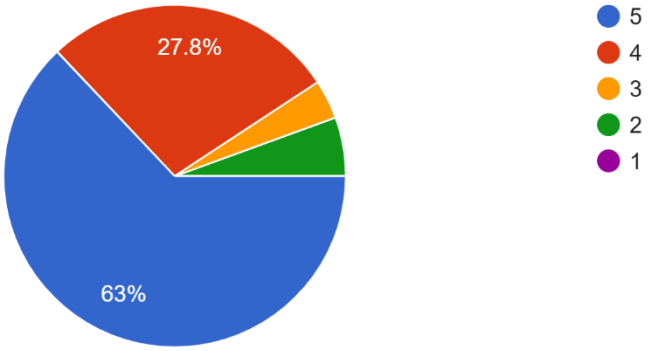

28. WLO3: Apply hands-on knowledge to develop/operate a basic mechatronic application.

54 responses

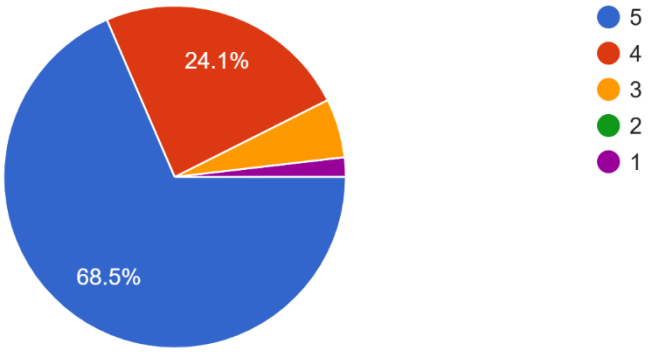

29. WLO4: Analyze and troubleshoot basic mechatronic system problems.

54 responses

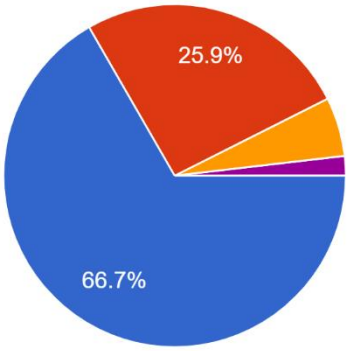

30. WLO5: Relate mechatronics concepts to industrial automation and intelligent manufacturing applications.

54 responses

31.Overall Learning Gain How much has your knowledge/skill improved after this workshop?

54 responses

స్వర్ణాంధ్రలో మెకాట్రానిక్స్ అంశంపై సదస్సు

నరసాపురం రూరల్,మేజర్ న్యూస్ : నందమంలోని సీతారాం పురంలో గల స్వర్ణాంధ్ర కాలేజ్ ఆఫ్ ఇంజినీరింగ్ అండ్ టెక్నాలజీ (అటానమస్),లో మెకానికల్ ఇంజినీరింగ్ విభాగం ఆధ్వర్యంలో 3,4 బి.టెక్ మెకానికల్ ఇంజినీరింగ్ విద్యార్థుల కోసం 'మెకాట్రానిక్స్' అనే అంశంపై మూడు రోజుల వర్క్‌షాప్‌ను బుధవారం ప్రారంభించారు.ఈ వర్క్‌షాప్‌ను మెకానికల్ వ్యవస్థలు, ఎలక్ట్రానిక్స్, ఆటోమేషన్, ఇంటెలిజెంట్ కంట్రోల్ టెక్నాలజీల సమన్వయంపై విద్యార్థులకు ప్రాయోగిక అవగాహన కల్పించడం ఈ కార్యక్రమం ప్రధాన ఉద్దేశ్యం. వర్క్‌షాప్‌ను రెండు బ్యాచ్‌లుగా నిర్వహించారు. బి.టెక్ మెకానికల్ ఇంజినీరింగ్ విద్యార్థులకు ఆగస్టు 20 నుండి 22 వరకు శిక్షణ అందించగా, 4,3బి.టెక్ విద్యార్థులకు సెప్టెంబర్ 5 నుండి సెప్టెంబర్ 8 వరకు ఫాల్కన్ ఐటీ ట్రైనింగ్ అండ్ ఎడ్యుకేషనల్ సర్వీసెస్ ఎల్ఎల్పి,చెన్నై సంస్థను చెందిన ఐఐటి ఇంజినీర్ మధన్ కుమార్ రిసోర్స్ పర్సన్‌గా పాల్గొని,ఆధునిక మెకాట్రానిక్స్ సాంకేతికతలు,ఆటోమేషన్ ఇంటెలిజెంట్ సిస్టమ్స్‌పై విద్యార్థులకు సాంకేతిక శిక్షణ అందించారు.ఈ కార్యక్రమానికి అసిస్టెంట్ ప్రొఫెసర్ ఎన్.బుల్లి రాజు ఫ్యాకల్టీ కోఆర్డినేటర్‌గా వ్యవహరించారు.ఈ కార్యక్రమనికి కళాశాల యాజమాన్యం, మెకానికల్ అధ్యాపకులు విద్యార్థులు,పాల్గొని వర్క్‌షాప్ను మంగించారు.
